Lancaster Farming

Vol. 19 No. 30 | Lancaster Farming, Saturday, June 8, 1974 | $2.00 Per Year

Dairy Month Profile . . .

Jugging, Ayrshires - His Key to Success

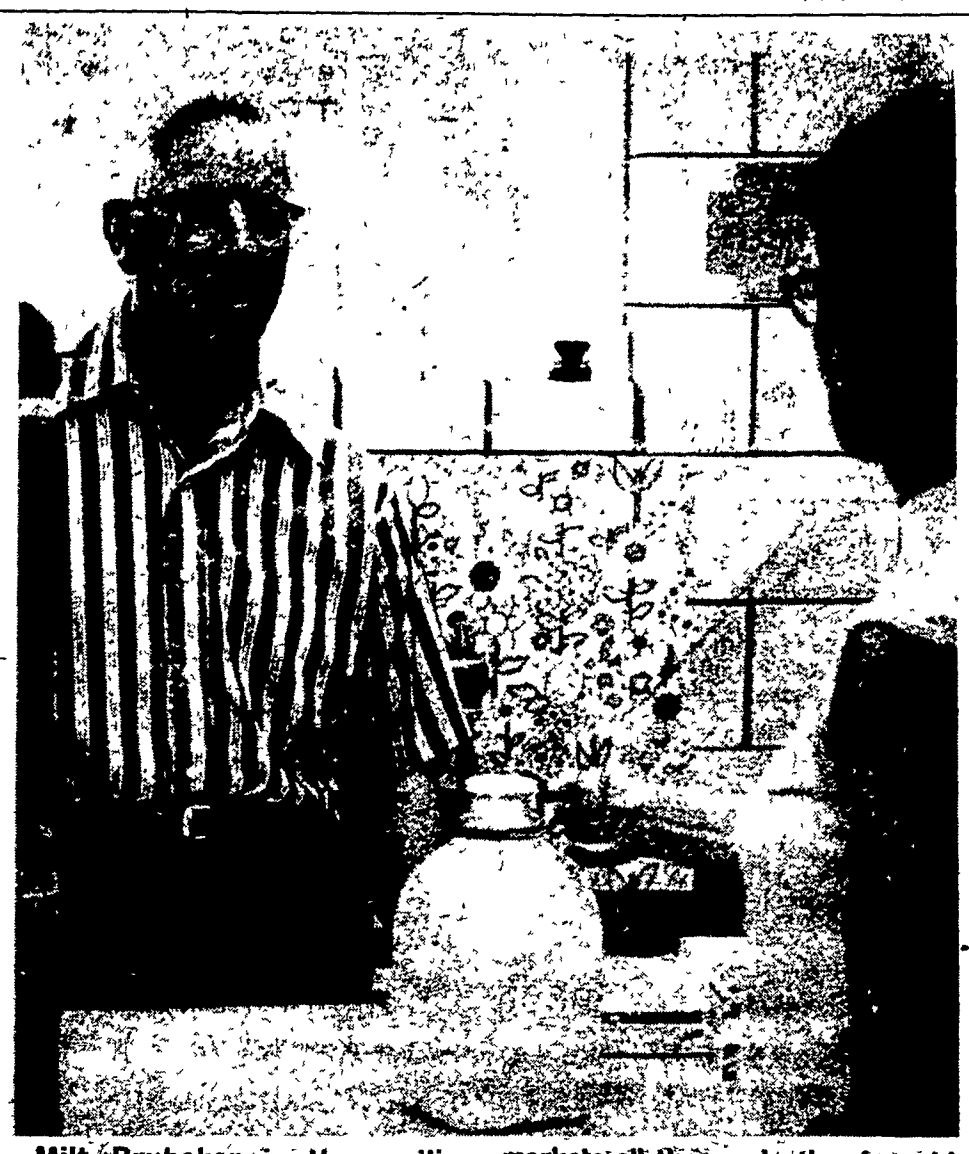
Two things set Milton Brubaker's dairy operation a little bit apart from the ordinary. First, he's a jugger, and has been for 14 years. Second, he has eschewed the ubiquitous black and white cow for the Ayrshire.

Last week, in our first dairy month issue, we contrasted a large dairy operation with a small one. This week we thought we'd talk to somebody who's doing something a bit out of the ordinary, and Brubaker - who's known as Milt to countless people throughout the state and county - is about as out of the ordinary as you can get. Besides retailing his own Ayrshire milk, Brubaker employs a full-time farm manager to handle all the farm chores, including milking.

Brubaker's Spruce Villa Dairy is at 660 Brunnerville Rd., Lititz. The 96-acre farm has been in the Brubaker family since 1945. It was owned before that by the Huber family, who acquired the land from William Penn himself.

Spruce Villa milk has been marketed to consumers in and around Lititz for almost 70 years. "My dad started selling milk in 1905," Brubaker said, "about the time dairies started using glass bottles. Before that, milkmen went from door to

[Continued on Page 7]



Milt Brubaker is the smiling proprietor of Spruce Villa Dairy, Lititz. Spruce Villa is a jugging operation through which Brubaker markets all the production from his milking herd of 50 Registered Ayrshires.

In Chester County . . .

Farm Tax Relief Meets Scheduled

The Chester County Cooperative Extension Service has announced that several meetings will be held throughout the county this month to inform landowners about Pennsylvania Act 515 and the July 1 deadline for applying for tax relief on farmland and other open space. Act 515 is a measure which provides for lower tax rates for landowners who agree to keep their land in open space for a specified number of years.

The constitutionality of Act 515 had been challenged in the courts some time ago. The challenge became a moot issue in the 1973 primary election though, with the passage of a consitiutional amendment permitting preferential tax treatment. This was the so-called Clean and Green amendment. Another preferential tax bill, HB 1056, is now being considered by the Pennsylvania Senate.

The Chester County meetings will be held to present facts that will help landowners decide whether or not they should take advantage of Act 515. Landowners will learn how to apply for tax relief, and they'll also be able to pick up application forms at the meetings.

Meetings are scheduled at 8:00 p.m. on the following dates and at these places: Tuesday, June 11, Owen J. Roberts High School

FARM TRENDS

by Dick Wanner

Come to the Fair Meeting

If you have any feelings pro or con on the subject of a Lancaster County Fair, you'll want to attend the meeting at 8:00 on Monday evening, June 24 at the Lancaster Farm and Home Center. County agent Max Smith is calling the meeting, he says, because he's been asked by many in the agricultural community to explore the possibilities. Smith himself has adopted a position of neutrality on the subject.

Farm leaders from all over the county have been

Dairy Princess Contestants

Six young ladies will be vying for the title of Lancaster County Dairy Princess on Saturday night, June 29, during the annual Dairy Princess Pageant at the Lancaster Farm and Home Center. There'll be a reception at 6:30 p.m., followed by dinner at 7:00.

Ralene Harbold, 1973 Princess, will review her year as official spokesman for the county's biggest agricultural enterprise. Miss Harbold will end her reign by crowning her successor.

Two of the three judges for the contest were named this week. They are former Lancaster County Dairy Princess Carol Hess, now Mrs. Larry Weaver, and Lewis Ayres, Akron, chairman of the vo-ag department at Ephrata Area High School. Master of ceremonies for the evening's festivities will be David Yoder, general manager of Atlantic Breeders.

Tickets for the affair are available from members of the pageant committee, according to Mr. and Mrs. Robert Gregory, committee chairmen. Other committee members are - William Deisley, Mrs. Robe Kauffman, Robert Keer Elvin Hess, Mrs. Samue Myer, Robert L. Kauffmar Jr., Milton Brubaker, Mi and Mrs. Clair Hershey, Mi and Mrs. Raymond Witmer and Mr. and Mrs. N. Ala Bair.

The contestants are:

Betty Jo Bitler, 16 daughter of Mr. and Mrs Ralph Bitler, Peach Botton RD2. Betty Jo is a membe of the Lancaster County 4-I Golden Guernsey Club, the 4 H County Council and the 4-I Dairy Judging Team. She i

SPECIALIZING IN FILLING FEEDER ORDERS

SERVING YOU SINCE 1895

YEN

Perhaps you've been harboring this secret desire to build your own swimming pool . . . or add a private greenhouse. Or maybe it's just that you and spouse have this pressing need to get away for a weekend in Williamsburg—or even an April in Paris. Whatever it is, if you've got the yen we've got the cash. At any branch there is a personal loan officer who is, as always, happy to help you.

New York Dressed Meats

Thursday, June 6

Daily distributive less than carlot meat trade.

Compared with Wednesday, prices weak throughout for all railstock classes while port appears to be leveling at downturns posted on mid-season for all listed cuts.

Lamb legs in process of accumulation while outlet holding poor for beef chucks and rough cuts. Meat wholesalers in the New York area report very good week's business with lower prices failing to stimulate buyer interest.

Steer Beef

Prime 600-900 pounds 67.00-68.00; Choice 600-700 66.50-68.50; 700-800 65.00-67.00; 800-900 64.00-65.50; Good 500-800 63.50-65.50.

Heifer Beef

Choice 500-700 pounds 66.00-68.00.

Choice Beef Cuts

Hinds (steer) 145-190 pounds 85.00-87.00; arm chucks 90-105 51.00-54.00; ribs (7-rib) 34-40 85.00-90.00; loins (trmd) 50-70 112.00-115.00; rounds (steer) 70-95 78.00-81.00; full plates 20.00-21.00; hinds (heifer) 120-170 84.00-86.00.

Fresh Pork Cuts

NOTICE

TO TOBACCO GROWERS

Farmers who grow tobacco plants should check the results of many who this season used Chix Nylon Plant Bed Covers It has been shown that plants mature earlier than with the conventional cotton plant bed covers Another advantage is that the nylon is only two thirds the price of cotton

The regular Chix Cotton Muslin with metal grommets in 2 and 3 yard widths will be available in the spring of 1975 and advance orders are now being taken Large commercial tobacco plant growers should contact us soon for full proposition *

Baltimore Eggs

Wednesday, June 5

Baltimore eggs: Market unsettled. Demand generally slow with only limited feature activity indicated. Supplies ample.

Cartoned eggs: prices to retailers, state graded (min one case sale) white.

Grade A Large 52-58, mostly 52-54; Grade A Medium 44-50, mostly 44-46.

Oklahoma City

Thursday, June 6

Estimated Receipts	6,000
Same Day Last Week	10,110

Feeder cattle and calves strong to 50 cents higher in fairly active trading; majority receipts Good and Choice 450-850 pound steers and 400-650 pound heifers; moderate attendance buyers; supplies curtailed due to several days of showers and wheat harvesting in this area.

FEEDER STEERS: Choice 300-400 pound 36.50-38.10; 400-500 34.50-38.30, part load 412 at 40.10; 500-600 33.25-36.80, load 530-at 37.20, small load 601 at 36.30; 700-800 31.50-33.15; 800-988 30.50-32.40; Mixed Good and Choice 400-500 32.00-34.00; 500-700 29.75-32.50; 700-900 28.50-31.00; Good 400-500 28.25-31.25; 500-750 26.25-29.50. Good 690-805 Holstein steers 24.80-28.30.

FEEDER HEIFERS: FEW Choice 300-360 pound 35.00-35.10; 400-500 31.50-35.00; 500-600 32.00-33.70; 600-660 30.50-32.40; mixed Good and Choice 300-500 29.50-33.30; 500-672 28.00-30.00; Good 435-660 26.00-29.40.

For the Week: Feeder cattle and calves steady to 50 cents lower, some good grade sales 1.00 lower; beef cows 25-50 cents higher; Canner and Cutter mainly 50 cents to 1.00 higher; bulls under pressure late and 1.00-1.50 lower, some under 1450 pound 2.00 lower. Salable receipts near 11,300 head compared to 16,178 last week and 24,165 the comparable period a year ago. Cows 12 percent cows receipts: feeders 85 percent of total.

Fogelsville

June 4, 1974

(Prices paid dock weights cents per lb.)

No market available at press time.

Poultry received Monday 7 p.m. to 10:30 p.m. Tuesday 7 a.m. to 12 Noon. Sale at 11:30 a.m.

Directions — Take Rt. 22 thruway. Exit at Fogelsville exit. North on stoplight in Fogelsville, turn left, proceed 1 mile.

Philadelphia Eggs

Wednesday, June 5

Prices steady. Cartoning demand good on mediums; light otherwise. Offerings of mediums barely adequate; other sizes fully adequate. Undertone unsettled.

Prices to retailers: Sales to volume buyers, consumer grades white eggs in cartons, delivered: store door A Extra Large 50-51½; A Large 49-50½; A Medium 39-40½.

Local Grain

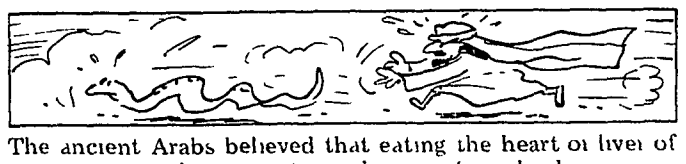
Thursday, June 6

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, June 6, 1974 are as follows:

	Bid+	Offered+
Ear Corn, Old	72.00	80.00
Ear Corn, New	75.00	81.00
Shelled Corn	2.72	3.10
Oats, Local	1.24	1.74
Oats, Western	1.77	2.02
Barley	2.05	2.40
Wheat	3.42	3.81
Soybeans	5.47	5.76

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.



The ancient Arabs believed that eating the heart or liver of a serpent gave the power to read omens from birds.

PENNFIELD'S UNI-PEL

DAIRY FLAKES SMELL . . .but good!

Pennfield Uni-Pel Flakes No. 522 is a coarse textured dairy feed that smells and tastes delicious. And, because it is so extremely palatable, your herd will consume more - and produce more. It's an appetizing blend of steamed, flaked corn, crimped oats, molasses and pellets that are a highly concentrated source of nutrients. Uni-Pel has the right amount of Sodium Bicarbonate that helps maintain high milk-fat tests.

Call Pennfield today and discuss your feeding needs with a Pennfield feeding expert. Uni-Pel just may be what you need. Your herd will love it. So will your profits.

A Sprinkle or two, then the sun peeks through.

Don't let that weeding go . . . Jack Johnson died June 11, 1946 . . . Third quarter of the moon June 12 . . . Father's Day June 16 . . . Average length of days for week, 15 hours, 17 minutes . . . Four Nazi saboteurs captured on Long Island June 13, 1942 . . . Baseball's "squeeze play" invented June 16, 1894 . . . Admitting you are wrong makes you strong.

Old Farmer's Riddle: What goes from one city to another without moving? (Answer below.)

Ask the Old Farmer: Did you ever hear of using a piece of dried fish-skin to settle coffee? G.N., Little Rock.

Yes, but that was when coffee was merely ground. With some of the pulverized varieties the whole darned codfish wouldn't settle it.

Home Hints If the end of your transparent tape sticks to the roll, place it in the refrigerator for approximately ten minutes. It can then be loosened without breaking either fingernails or tape . . . *Riddle answer:* Railroad tracks.

OLD FARMER'S WEATHER FORECASTS

New England: Intermittent spring showers for first part of week; cloudy and cool by end of week.

Greater New York-New Jersey: Mostly clear to start, then becoming hot; some rain and cooler latter part.

Middle Atlantic Coastal: Generally clear and very warm at first, then light rain; moderately heavy rain at end of week.

Southeast Coastal-Piedmont: Week begins mostly clear and warm, then rain; rain continuing to end of week.

Florida: Rain off and on all week from possible tropical storm.

Upstate & Western N.Y.-Toronto & Montreal: Rain starting in west, then moving east by midweek; heavy rain latter part except sunny and warm in west.

Greater Ohio Valley: Early week pleasant and hot; intermittent hard rain at week's end.

Deep South: First part of week clear and hot; end of week rainy and cooler.

Chicago and Southern Great Lakes: Hot to start, then rain and cooler; partial clearing latter part, then more rain on weekend.

Northern Great Plains-Great Lakes: Week begins hot and showery, then cooler; rain, heavy at times, latter part.

Central Great Plains: Hot in east and rainy in west to start, then cooling rain in east by midweek; end of week clearing and hot.

Texas-Oklahoma: Partly cloudy and hot at first, then rain and cooler; clearing and hot latter part.

Rocky Mountain Region: Week begins rainy, heavy in north, then mild end of week mostly sunny and warmer.

Southwest Desert: Generally clear and hot throughout week with highs reaching 100 by week's end.

Pacific Northwest: First part of week rainy and cool; becoming partly sunny by end of week.

California: Mostly cloudy to start, then rain by midweek; partial clearing in south by end of week.

In earlier times, scientists thought that maggots were blown onto meat by blow-flies!

Pa. Auction Summary

Weekly Summary
12 Livestock Markets
Week Ending May 21

CATTLE 5409: Compared with 5288 head last week, and 5844 head a year ago. Compared with last week's market, slaughter steers & bullocks weak to $1 lower. Slaughter cows 25 cents to $1.50 lower. Slaughter bulls 25 cents to $2 lower.

STEERS: High Choice & Prime 40.50-41.60, Choice 38.50-40.60, Good 35.50-38.50, Standard 33.50-37.00, Utility 31.85-35.00.

HEIFERS: Few Choice 36.00-38.75, few Good 34.00-37.50, few Standard 33.50-34.00, few Utility 30.75-33.00.

COWS: Utility & High Dressing Cutter slaughter cows 29.50-33.00, Cutters 29.00-31.85, Canners 26.50-29.50, Shells down to 23.75.

BULLOCKS: Choice 36.75-39.60, Good 35.00-38.25, Standard 34.00-37.00, few Utility 32.35-35.60.

BULLS: Yield Grade 1-2 1000-2200 pounds slaughter bulls 33.35-39.75. Medium & Good 300-700 feeder steers 38.00-47.00.

CALVES 2083: Compared with 2424 head last week, and 3063 head a year ago. Vealers mostly $1 lower.

VEALERS: Prime 67.00-72.00, Choice 63.00-71.00, Good 57.00-66.00, Standard 50.00-58.00, Utility 90-120 pounds 39.00-50.00, 70-85 34.00-41.00.

Farm calves, Holstein bulls 90-125 46.00-64.00; Holstein heifers 90-140 47.00-64.00; beef cross bulls & heifers 70-140 50.00-77.00.

HOGS 5412: Compared with 6380 head last week, and 5527 head a year ago. Barrows & Gilts 25 cents to 50 cents lower.

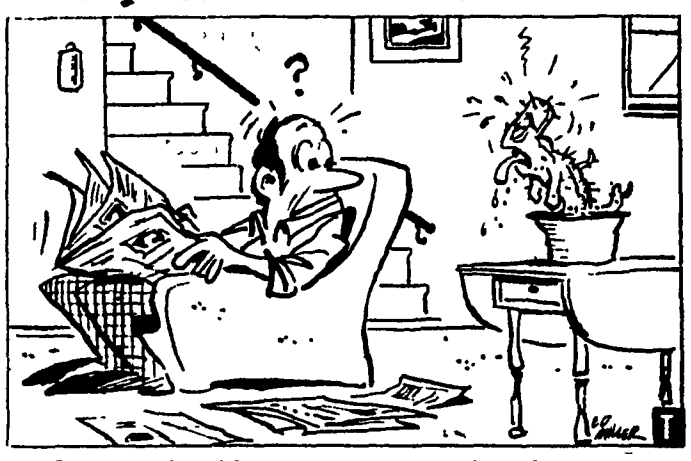
BARROWS & GILTS: US 1-3 200-240 pounds 27.00-29.00, 2-3 190-250 26.00-27.75, 2-4 250-300 24.70-26.60, 2-4 140-180 20.75-25.80.

SOWS: US 1-3 300-550 pounds 20.00-24.25, 2-3 300-600 17.00-21.75. Boars 18.00-21.00.

FEEDER PIGS 637: Compared with 823 head last week, and 901 head a year ago. US 1-3 20-35 pounds feeder pigs 13.00-18.50 per head, 1-3 35-50 16.00-24.50, 1-3 60-75 20.00-27.50.

SHEEP 508: Compared with 976 head last week, and 883 head a year ago. Spring slaughter lambs steady to $2 lower. Choice 70-100 spring slaughter lambs 42.00-50.00. Good 60-90 31.00-42.00. Slaughter ewes 10.00-18.50.

HOW HUMIDITY AFFECTS COMFORT



You may be risking the health and comfort of your family and yourself without even knowing it -- if your home is too dry!

According to the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE) the comforts of home are more so when the relative humidity indoors is between 30 and 60 percent.

An ASHRAE study shows that higher humidity deserves a warm welcome. They discovered that when the degree of dampness in a cool room is raised, people begin to feel warmer immediately.

Low levels of humidity not only leave you out in the cold, they can also contribute to giving you a cold. Medical opinion attributes the increased incidence of respiratory complaints in winter to low indoor humidity. Dry air absorbs moisture from everything it encounters, including the membranes of the nose and throat. It makes the skin feel itchy and flaky too.

In addition, relative humidity has been shown to have a significant effect on airborne infections. At 50 percent relative humidity, the greatest number of germs are destroyed, and influenza viruses lose much of their virulence.

This may come as shock to some, but more moisture in the air also means fewer static shocks when walking on carpets or handling paper and fabrics. A humidity percentage of at least 45 is needed to keep the sparks from flying from most things, and wool and some synthetics should be wetter still.

Fortunately, you can put a damper on all these problems with a humidifier from Westinghouse--and so keep from feeling high and dry!

Jugging, Ayrshires

(Continued from Page 1)

door with their milk cans and poured the milk into pitchers or whatever containers the customers had. In 1922, he sold the milk delivery routes, but then in 1929, when the Depression came along, he started up again. At that time, we delivered raw milk for a retail price of eight cents a quart."

Retail deliverymen sold Spruce Villa milk from 1929 until 1964, when the routes were sold to Moore Dairies. At that time, Brubaker had already been operating a retail store for about four years, and after 11 years of full-time jugging, he is satisfied with his lot.

"Jugging makes a lot more sense for the small dealer," Brubaker said. "Home deliveries are just getting too expensive. Even the larger companies are finding it hard to keep on with home deliveries, and in most big cities nobody delivers anymore...

"One of the problems is that people aren't home during the day. More and more housewives are working, so they're not there anymore to bring the milk in out of the cold or the heat. Collections can be a big problem, too. Here in Lancaster County we have a fairly stable population and honest people, but some places a milkman can take real losses on home deliveries. We're still going to have retail routes for a while yet, but I think the milkman is eventually going to go the way of the bread man. The small dairies, the ones with one to six routes, just can't make it."

As evidence of his feelings, Brubaker pointed to the Lancaster County Dairymen's Association and Bottle Exchange. In the 1930's, he said, this group had some 70 members. That figure has dwindled steadily until today there are fewer than 10 members.

Brubaker feels there's plenty of room in the market for the jugger. He sells the entire output of his 50-cow milking herd for $1.20 a gallon, or about $14.40 a hundred before deducting selling expenses. "My biggest problem isn't so much in selling the milk," he said, "it's in having enough to sell."

Customers regularly stop in at the tiny Spruce Villa outlet to pick up their milk. Some stop two or three times a week on their way home from work. Some stop once a week and buy eight to ten gallons at a time. Spruce Villa milk is sold in half-gallon and gallon glass bottles. Deposits are collected on the bottles - 25 cents for the half-gallon size and 40 cents for the gallon - so that the amount of capital Brubaker has tied up in bottles is virtually nil.

In the past three years, jugging operations throughout the state have grown from about 200 to 250. There are presently nine in Lancaster County, with another two dairy farmers seriously thinking about starting up.

Under the Pennsylvania Milk Marketing Law, a jugger must produce, process and sell his own milk on his own premises in order to be exempt from the minimum pricing regulations set by the Milk Marketing Board. Juggers must meet the same sanitation standards set for regular commercial dairies. Jugging has grown considerably in recent years, but may not expand quite as fast in the years just ahead, Brubaker commented.

"When we started jugging, dairy farmers were getting paid $3.50 a hundred for their milk. And it cost us about $25,000 to set up our processing plant. Today, if a farmer has to build a store and a plant both, he'll be investing close to $100,000 in the business. And with milk pushing $10 a hundred, I don't know how many farmers would want to put that kind of money into jugging."

Another factor that could turn some farmers off the idea of jugging is that retailing tends to tie down the retailer just as dairying ties down the dairyman. And when the dairyman is his own retailer, he's really tied down. The Spruce Villa store hours are 9:00 a.m. to 8:00 p.m. Monday through Friday, 9:00 to 7:00 on Saturday, and 4:00 to 7:00 on Sunday.

A long-time figure in dairy youth activities, Brubaker is a strong believer in hiring young people both in his store and in the processing plant. He has local high school girls working in the store every night. He has enough of a labor force so that each attendant works only one or two nights a week. And he hires high school boys to help in the processing. "I'm a great believer in giving kids something to do. A part-time job gets them used to working, it gives them a chance to earn some money, so they'll know what it is to earn it and so they'll learn how to handle it."

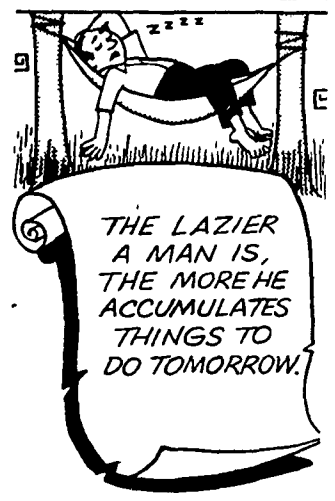
Brubaker also devotes time to the Lancaster County Ayrshire, Brown Swiss and Jersey 4-H Club, where he's been a leader for the past 20 years.

Farm operations - milking, planting, harvesting, etc. - are handled under contract by a young farmer. It's an arrangement which Brubaker feels enables a younger man to get into farming gradually. Brubaker owns the farm and the cattle, he pays the taxes and repairs and buys all the fertilizer and lime.

The farmer owns the farm equipment, and gets a percentage of both the milk production and the calf crop. Management is a joint effort between Brubaker and his contract farmer.

Ayrshires have been a Spruce Villa mainstay ever since 1934. "Before that, we just had cows," Brubaker said: "Mostly grade Holsteins but a few others, too. We decided to go to Ayrshires back then because milk was sold on the basis of its cream content. Our routemen could go to a housewife and say, 'Look at how much more cream our milk has. Don't you think you ought to buy it?' Today, with homogenization, that's not so important. But I still like Ayrshires, and I think there's a place for all the colored breeds. With Ayrshires, I think you can make more money from an acre of feed than you can with any other breed. And to me, that's what's important."

PUNCH LINE
OF THE WEEK



No-service-charge checking that makes cents!

The Friendly First has become famous for no-service-charge checking. Why?

Because—even if you write just a few checks each month—you can save dollars each year at the Friendly First where—

- you never pay a charge for the checks you write—no matter how few or how many.
- you don't have to keep a minimum balance in your checking account Instead, you can maintain just what you need . . . and keep the rest in a savings account where it will make money for you

And without that bothersome service charge on your statement, you'll find it very easy to balance your checking account!

So why not stop today—at any office of the Friendly First—and enjoy a free cup of coffee while opening your no-service-charge checking account—checking that makes cents!

Preserve Maximum Nutrient Content and Palatability
by using
"Silo-King" Silage Preservative:

DON'T WASTE A THING, YOUR CROPS ARE TOO VALUABLE

— Hay or haylage value ranges from $20.00 to $80.00 per ton in feeding value: on a 10 percent dry matter basis.
— Due to the ever increasing cost of feeding and maintaining livestock, your future may depend on your handling of roughage in the most profitable manner.
— To prevent weather loss in making haylage, mow in the morning after the dew is off and chop that afternoon on a good drying day:
— And to help prevent heating, vitamin loss, energy loss, protein loss, and silo-stink, apply "SILO-KING" silage preservative.
— Another bonus from using "SILO-KING" is greater silo capacity. This is due to the higher moisture content that's possible to maintain by using "SILO-KING"

For outstanding results, proven again and again in 23 states and Canada.
For higher feeding value and greater silo capacity.

Apple Growers Vote To Triple Assessment

Pennsylvania apple growers have voted to triple the amount of money they assess themselves for promotional purposes, Secretary of Agriculture Jim McHale said today.

In announcing the results of a special referendum which ended Wednesday, May 29, Secretary McHale said 54 percent of the growers casting ballots voted in favor of the increase. They represented 61 percent of the production volume of the those voting.

As a result, state apple growers with 500 or more trees of all ages will pay into a promotional fund five cents per bushel for apples sold for the fresh market and two cents per hundredweight for apples sold for processing.

"This will result in an annual budget of about $150,000 for promotional purposes," Secretary McHale said. "The previous assessment rate brought in only about $50,000. The growers are to be congratulated on recognizing the need for greater promotional activities in order to increase apple demand. The vote also reflects the confidence the industry has in the Apple Marketing Board, made up of growers who plan the program and spend the money."

A total of 188 ballots were cast, with 92 in favor and 77 against. A total of 19 were declared ineligible. The volume of production represented by the affirmative ballots totaled 3,934,682 bushels out of a total of 6,457,850 bushels. The Teller Committee was made up of Ralph W. Tyson, Gardners; Richard H. Mattern, Hollidaysburg; and Stanley E. Brown, Loganville, all apple growers.

The new assessment rate will be effective with the 1974 harvest. The old rate amounted to three cents per hundredweight for fresh apples and one cent a hundredweight for processing apples.

The referendum was requested by the State Horticultural Association.

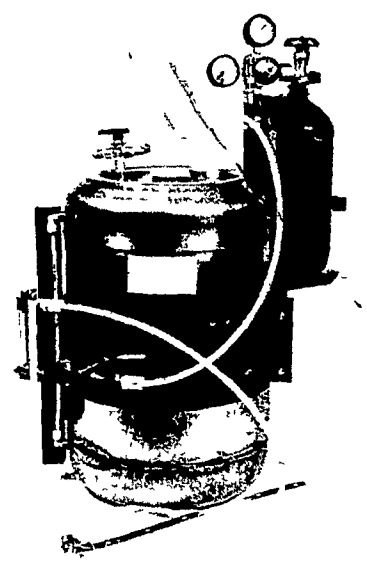
BEACON

Hay Pre-Serv

Harvest more hay per acre...more digestible nutrients per ton.

Hay Pre-Serv helps retain the nutrition, palatability and just-cut coloration of hay. It increases the digestible nutrients. You can safely store hay up to 25 percent moisture without worry. Hay Pre-Serv costs little to use, and achieves the results you've wanted.

Stainless Steel Liquid Applicator.



Beacon's S S Liquid Applicator is pressure operated and accurately dispenses Beacon Hay Pre-Serv in the form of a spray The applicator is easily mounted on all types of haying equipment. Unit can also be used to treat silage. With minor modification, unit may be used for treating high moisture (25%) grain.

ADVANTAGES

- Stainless steel reservoir
- Easily mounted or installed
- Powered by compressed CO_2 gas or 12 volt air compressor
- Built-in safety features
- Maintenance at a minimum
- Holds 120 lbs. of chemicals
- One year warranty on reservoir
- One year warranty on compressor and balance of applicator
- Liquid level gauge
- All parts chemically resistant
- One tank of CO_2 dispenses 300 to 500 lbs of chemical under average conditions
- Pressure regulator can be permanently set
- Pressure gauge indicates amount of CO_2 in pressure bottle
- Flow meter to observe flow of chemical
- Liquid filter
- Nozzle assembly available

Gypsy Moth Traps Set

Special "sex" traps will be scattered throughout the continental United States this summer to catch the destructive gypsy moth, the U.S. Department of Agriculture (USDA) has announced.

Leo G. K. Iverson, Deputy Administrator of USDA's Animal and Plant Health Inspection Service (APHIS), explained that the traps will be used to detect the spread of these leaf-eating insects.

Gypsy moth caterpillars have recently hatched throughout Northeastern states. Only the leaf-eating caterpillar stage is destructive. Evergreens may die after one complete defoliation. Severe successive defoliations may kill birch, oak, and other hardwood trees.

At present, the main gypsy moth infestation covers much of the Northeast, where 1.7 million acres of woodlands were defoliated in 1973. However, since 1970, this pest has spread outside the Northeast resulting in scattered, isolated infestations as far south as North Carolina and west to Michigan.

This summer's trapping program will use a synthetic sex attractant disparlure—to draw male moths to sticky traps. About 60,000 traps will be in place by mid-June. In September, they will be picked up and turned in to APHIS and state entomologists for indentification of insects caught.

APHIS and cooperating state agencies are currently distributing the traps. Special training sessions are being held for members of the National Campers and Hikers Association (NCHA)—a national conservation - camping organization which is helping with the trapping program again this year.

"Last year was the first time we had the voluntary participation of an organization like NCHA in the federal-state trapping program," Mr. Iverson said. "Because of this assistance we were able to supplement our program and increase coverage. In fact, NCHA trapped moths in a number of areas where we didn't expect to find the pest."

SECRET

Let's face it: You've got more enjoyable ways to spend your time than asking for a personal loan. We know that, and we try to ease the pain as much as possible. For one thing, you deal with just one person, a specialist, our loan officer. His service is speedy, our form is simple, and your business is held in strictest confidence. And we'll let you in on a little secret. Because banking is our business, when you ask for a loan, *you're* doing *us* a favor. We never forget that.

Commonwealth National Bank

Offices throughout south central Pennsylvania

"Grassroots Opinion"

BELTON, TEXAS, JOURNAL AND BELL COUNTY DEMOCRAT: "On the subject of baldness, this country's welfare program is an extravagant disgrace. Admittedly, many welfare recipients are legitimate and deserving, and those of us more fortunate should help them. But the frauds are becoming rampant . . . My initial thought was to take half the poeple off welfare and give them jobs investigating the remaining half. That would not work, because the government would then have to hire investigators to investigate the investigators, and later conduct an extensive survey to determine why the plan did not work."

xxx

HUNTINGTON, IND., HERALD-PRESS: "When the Federal Government does things, it uses such a heavy hand that one sometimes wonders whether the Constitution is still in a viable state. Remember that part about state's rights? They dwindle farther and farther into the past. What brings such somber thoughts to mind is the . . . passage by the U. S. Senate of a bill calling for a 55 mile-an-hour speed limit across the nation in order to conserve gasoline supplies. In itself, the bill is admirable . . . the bill not only makes sense in that it would conserve gas, but it will probably conserve human life, too. The bad feature about the bill, exposing the heavy hand of the Federal Bureaucrats, is the tag line on the bill. The Senate warns that states not implementing the speed limit would face loss of federal highway funds. No effort to gain support through reason and logic! No recommendations from Federal Big Brother! Just the harsh warning that the States will obey or lose their road funds. The irony of the order is that those funds are not the Federal Government's to begin with. That money was accumulated from the pennies you and I paid out in taxes . . . the Federal Bureaucrats won't give us our own money back. That is no way to develop confidence in government. An urgent appeal for cooperation from state governments would be more in line."

xxx

LONG BEACH, CALIF., SIGNAL HILL TRIBUNE: "That between the energy crisis and the fuel shortage is us. The amazing thing is that some people are trying to find one person or group to blame. Actually, what is needed is for each of us to use a little old fashioned Yankee ingenuity and see in how many ways we can reduce our use of power, lights and gasoline."

xxx

BRIDGEPORT, ILL., LEADER: "If we love life, and who doesn't, then we must place a high value on time. Our own age has been good to us because it has given us more time to live and consequently more time to enjoy things about us -- our children, grandchildren, friends, etc. We have gained in two ways: We live longer, and we are in a position to enjoy life more while we are living."

xxx

HARRISONBURG, VA., NEWS-RECORD: "It used to be that a big automobile was the sign of a man who had come a long way. Now it's the mark of a man who isn't going very far, especially on Sundays."

xxx

The METER, an Oklahoma Gas and Electric Company publication, reports, "The number one best selling book in the Soviet Union is out again -- the telephone book. It's the first new edition since 1958. The price of each copy of the book is equivalent to $16. In it, Ivanov is the most common Russian surname -- there are 33 pages of Ivanovs. The book contains no yellow pages."

xxx

BARRON'S, Business & Financial Weekly notes, "DDT, ruled the EPA, may be used by the U. S. Forest Service to control tussock moth infestations on some 650,000 acres of public forest land in Washington, Oregon and Idaho, in case of an emergency' -- which EPA hopes will not arise. However, EPA boss Russell E. Train admits that there is 'no assurance that the epidemic won't continue or, in fact, increase in the coming season.' EPA 'experts' erred last year, when they confidently expected the plague to subside . . . Having helped devastate the environment, Mr Train promptly attacked the Forest Service for 'almost totally inadequate' research efforts into alternative tussock moth controls. Private owners of timberland, as well as national parks, still are barred from protecting their trees with DDT."

xxx

GRAYSLAKE, ILL., TIMES: "Along with this newspaper's campaign to rid our countryside of blight, the automobile ashtray dumper has to be rated a spot right next to the nocturnal roadside dumper as one of society's most unpopular people. There is nothing more disgusting than pulling into a parking spot and finding a mound of cigarette butts heaped on the roadway."

xxx

BUCKEYE, ARIX., NEWS: ". . . do you realize that some 76,000 Americans didn't bother to claim their (tax) refunds last year? That's right -- the IRS has more than 76,000 undeliverable refund checks on hand totaling more than $18 million. However, almost 63 million people did claim refunds and the IRS handed $25.8 billion to taxpayers. Good luck in the months ahead."

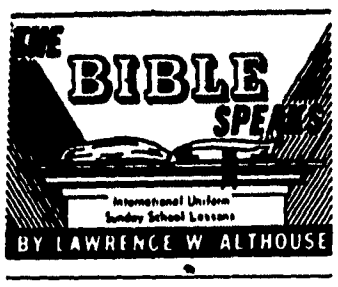
Letters to the Editor

Editor: There is currently before the House of Representatives in Harrisburg a bill to permit the transfer of bulk wine between wineries within the state. This bill, as Senate Bill No. 1484, has successfully cleared the Senate but has now run into a problem in the House largely as a consequence of lobbying by the Tavern Owner's Assoc.

We do not feel that the tavern owners understand the specific purpose of the bill and are objecting to it on the general basis that it liberalizes to a very minor degree the present restrictions on the opertion of limited wineries. They seem to feel that the wineries represent a threat to their future profitable operation.

The enactment of this leglislation will provide much needed operating flexibility for the wineries in Pennsylvania and thereby improve their competitive position. I would like to urge all growers and other members of the grape industry to contact their representatives in Harrisburg and ask them to support S. B. 1484.

H. Peterman Wood
President,
Southeastern Grape
Industry Assoc.



SUCCESSFUL PASTOR

Lesson for June 9, 1974

Background Scripture: 1 Thessalonians 2, 3.

Devotional Reading: Ezekiel 34:11-16.

One day many years ago these words came into my mind:

I am called—

Not to be successful in my ministry,

But to be faithful in my witness.

That will be success enough.

I copied on a card these words that seemed to have come from the depths of my own heart. That card has been on my desk for more than a decade.

Though there is nothing particularly profound about these words, the little card and its contents have often spoken deeply to my needs as a pastor. The words remind me of basic truths I am ever tempted to forget. As a minister, as a pastor, I need to be reminded of the specific nature of my "call" from God.

In the face of opposition

I am particularly in need of this when my efforts to declare the gospel are surrounded with great opposition. It is one thing to preach to a congregation that is receptive to the gospel and there is no opposition in the community. It is something else to do this when our witness is likely to cost us something.

Writing to the church at Thessaloncia, Paul reminded the congregation of the courage that he and his associates displayed when, coming fresh from their tragic and violent experiences in Philippi, they came to Thessalonica and began their work there. What had happened at Philippi would have been enough to scare off most men, but Paul and his associate bravely began their work despite great opposition, particularly from the gentiles.

To please God, not men

Quite apart from our inate fear of danger and injury, there is also the motivation of wanting to please people. It is natural for us to want to please people and it is disagreeable to have to displease them. But we need to remember that our purpose on earth is not, as Paul put it, "to please men, but to please God . . . "(2:4).

Although most of us know that, many of us still operate as if the pastor's success is to be measured in terms of the number of people he can please. Thus, the pastor is tempted to compromise his call rather than sacrifice his popularity. And often the activities that guarantee popularity are not pleasing to God.

So, the pastor knows that he has a task of speaking for God to his people and that often what he has to say is not to their liking. He knows that he may be rejected. Happy is the pastor who understands that success in the ministry is not a matter of pleasing men, but of pleasing God through our faithful witness.

County Agr. Agent
Telephone 394-6851

To Prepare Grain Bins

The current winter barley and wheat crops are maturing and soon the combines will be harvesting the new crop. With favorable prices it is essential that grain insects be kept from the new barley and wheat. Old grain should be removed from the bin before new grain is stored. The bin should be given a good cleaning and then sprayed with Malathion or Methoxychlor. This will eliminate any stored grain insects and protect the new crop.

To Feed Alfalfa Plants

Many fields of alfalfa were cut this past week and the new growth should be encouraged to a maximum. If alfalfa weevil was present when the first crop was made, then the area should be sprayed to kill the feeding worms. In addition, a top-dressing of a phosphorus-potash fertilizer between cutting will increase later yields and keep the plant roots well supplied. Alfalfa is one of the most important forage crops and the most expensive forage crop to buy. Every effort should be made to get maximum yields this summer.

To Control Canada Thistles

We're aware of some very healthy thistle plants throughout the county, and not all of these are on vacant lots and unfarmed ground. Every land owner should see that thistles do not have a chance to mature and blow throughout the community. Winter grain fields often have patches of thistles that are permitted to mature and not cut until combining. There areas could be sprayed or mowed to keep the thistles from maturing. Small patches of thistles this year might mean larger patches next year and several new ones. Don't be a thistle producer.

To Inspect Crops Often

A good farm manager will observe his livestock several times daily to detect sick or injured animals. By the same measure, a good crop farmer should inspect his growing crops several times each week to notice any insect or disease infestation. Insects such as armyworm or aphids can appear quickly and do considerable damage if not controlled in a few days. The "eye of the master" applies to crop production as well as livestock. Good managers are alert to new problems and get on them at once. Don't believe they will go away in a day or two if the weather changes.

Farm Calendar

Sunday, June 9

June 9-13 - 89th Annual Holstein Fresian Assoc. convention, Howard Johnson Motor Lodge, Atlantic City.

Monday, June 10

8:00 p.m. - Fulton Grange ice cream and strawberry night, Grange Hall, Oakryn.

Thursday, June 13

Elizabethtown Adult Farmer meeting, Topic - Alfalfa production.

Lebanon County Dairy Princess contest, Mt. Zion Fire Hall.

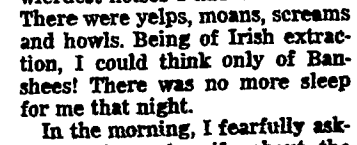
Friday, June 14

2:00 p.m. - PEMA meeting, tour of poultry facilities at Penn State, meet in lobby of Nittany Lion Inn.

American Viewpoints

Let us remember that revolutions do not always establish freedom.

—Millard Fillmore



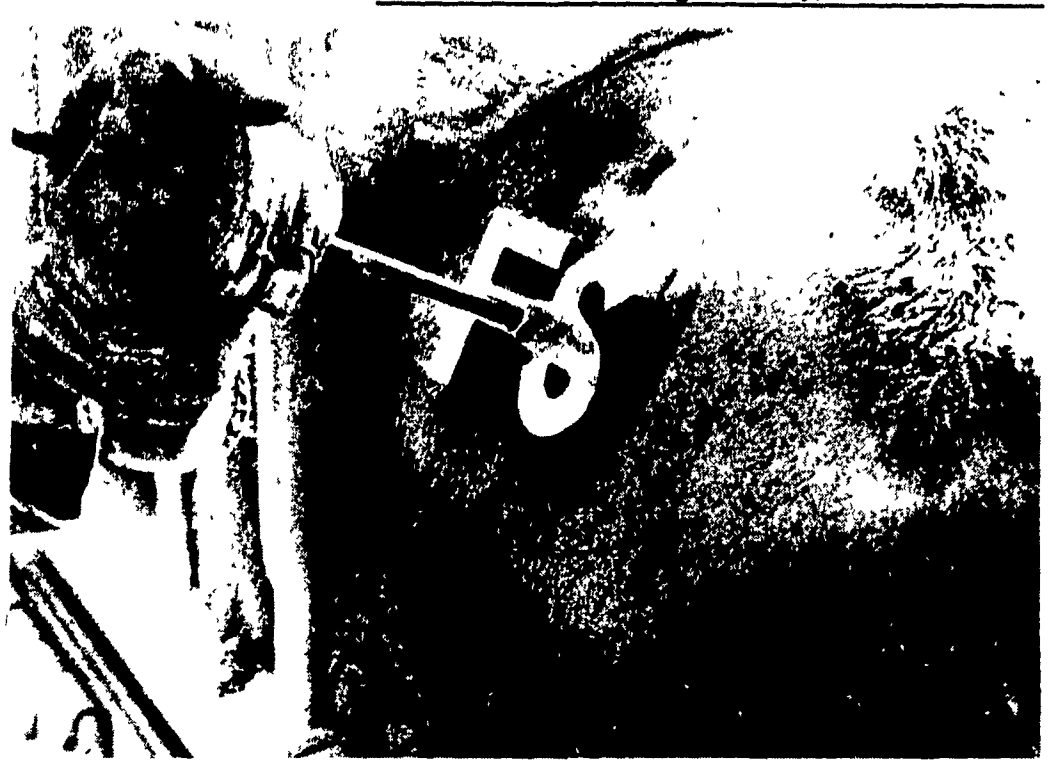
From Mrs. F. R. Gale, Calgary, Alberta: I remember, at the age of eighteen, finding myself enroute to the Canadian Northwest, where I was to become a teacher in a small village.

A kindly townsman drove me to the farmhouse where I was to spend a night. I was awed by the wide expanse of prairie land and I marvelled at the great herds of cattle, more than I had ever seen at one time.

The farmer, his wife and son lived in one large room. I wondered where I might sleep. At bedtime, a curtain was drawn, dividing the room. I was given a cot with a straw matress. It had been quickly made up and I found myself sliding down one side, then the other. However, I finally managed to sleep, but suddenly I was awakened by the wierdest noises I had ever heard. There were yelps, moans, screams and howls. Being of Irish extraction, I could think only of Banshees! There was no more sleep for me that night.

In the morning, I fearfully asked the farmer's wife about the nightmarish sounds, and was told they were the howls of coyotes, the small prairie wolves. They have become an accustomed sight, but I still remember my first night in the West!

Jason Weaver, Quarryville RD2, applies the working end of a freeze brander to a 4-H steer bound for the Pennsylvania Farm Show. Keeping track of the seconds elapsed is Wilmer Nissley, Mt. Joy. Both men are 4-H leaders.



Frost, not smoke, is the stuff you see when cattle are freeze branded. The "FS" being applied to this steer's hide stands for Farm Show. Pennsylvania Farm Show regulations say that all steers entered in the baby beef contest must be on feed and freeze branded by June 1.

116 4-H Farm Show Steers Freeze Branded

Some 116 members of the Red Rose 4-H Baby Beef Club brought their hopes for the Pennsylvania Farm Show to Myers Black and White Holstein Barn the other Saturday. That's the number of steers that were freeze branded with an "FS" - for Farm Show - mark in preparation for their trip to Harrisburg next January.

This marks the second year in a row for the freeze branding operation. Farm Show regulations say that all steers to be entered in the Junior Baby Beef contest must be on feed and branded by June 1. The young cattlemen have been in the process of choosing their steers since last October. Now, with their animals branded, they're locked into their choice.

The freeze brander marks the cattle with intense cold rather than searing heat. Instead of a scar, freeze branding produces an area of lighter colored hair. It takes 50 seconds to freeze brand a collored animal and 75 seconds for an animal with a white coat.

Eric, a medieval King of Sweden, was purported to be able to control the winds with a turn of his cap!

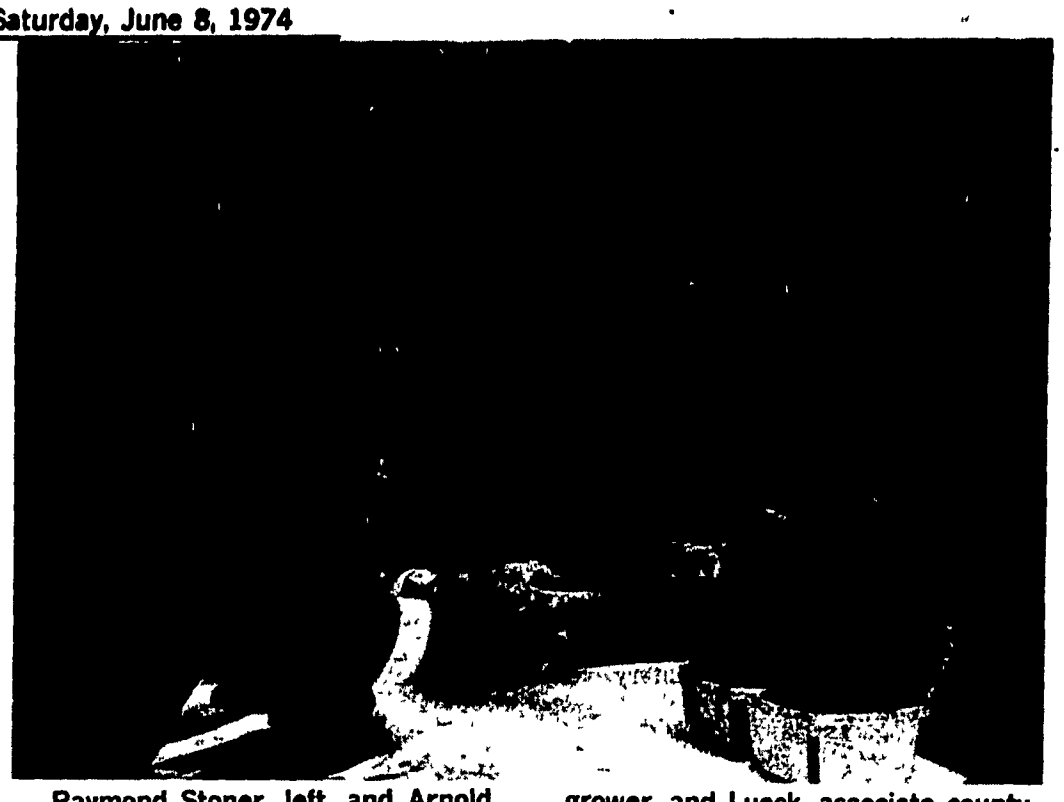
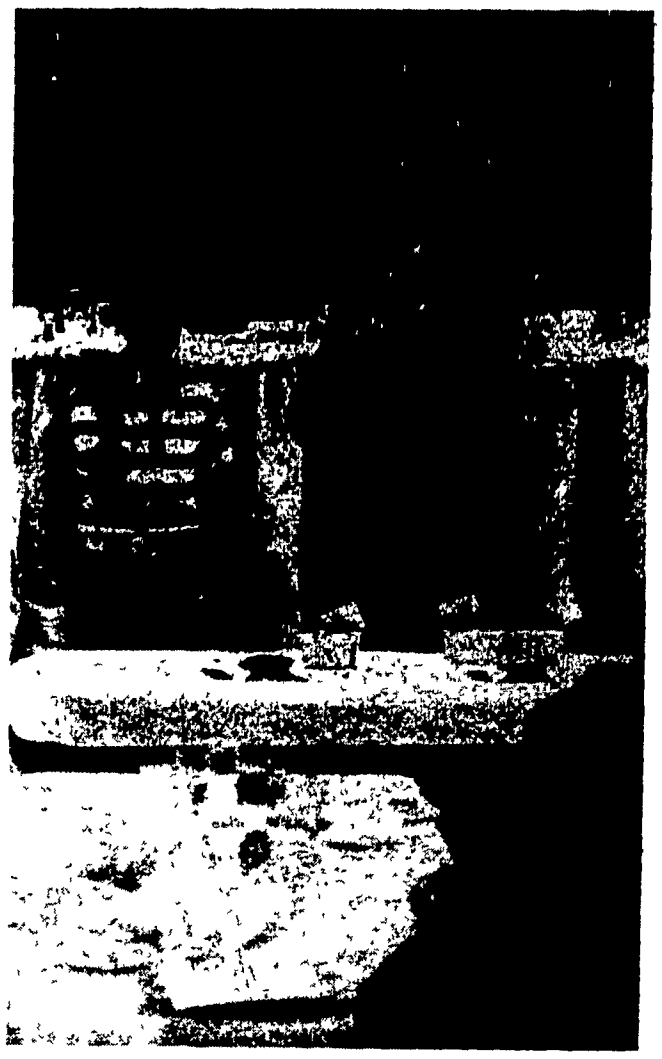
$12/quart Sets New High at Straw-berry Roundup



Raymond Stoner, left, and Arnold Lueck take a critical look at J. Edward Nissley's prize-winning entry in the annual 4-H Strawberry Roundup sponsored by the Lancaster Rotary Club. Stoner, a veteran strawberry grower, and Lueck, associate county agent, were the official judges for the contest. They based their decision on color, uniformity of size, firmness and general appearance.



"Y'mean to tell me $10.50 is all you're going to pay for this quart of champion strawberries?" That's what Mt. Joy auctioneer Harold Keller asked the Lancaster Rotarians on Wednesday at their annual 4-H Strawberry Roundup. Holding the blue ribbon berries aloft is contest winner J. Edward Nissley. The Club members answered Keller's question by boosting the bid to a record breaking $12 for the quart.

Lancaster Rotary Club members paid handsomely for the privilege of eating some of Lancaster County's finest strawberries on Wednesday. The occasion was the annual 4-H Strawberry Roundup, sponsored by the Rotary Club and won this year by J. Edward Nissley.

Mt. Joy auctioneer Harold Keller presuaded Rotarian James R. Wohlsen that $12 was a reasonable price for a single quart of Eddie's prize winning berries. Wholsen, 1533 Quarry Lane, is a local building contractor. The $12 figure was the highest ever paid at the roundup for a quart of strawberries.

The 11-year-old winner is the son of Mr. and Mrs. J. R. Nissley, Manheim RD5, and a member of the Elm-Penryn Club. He went home from the roundup some $40 richer, collecting $5 in prize money for his berries, another $5 for his first place record book, plus a $5 award from the Rotary. In addidtion to the $12 paid for the first quart of berries sold, he received $7.50 for the other quart he entered in the contest. And, like the other contestants, Eddie had four or five quarts not entered which sold for $1 each.

The reserve champion berries, exhibited by Cynthia Erb, were sold for $5 and $2.50 a box. Cynthia is the daughter of Mr. and Mrs. Wilbur Erb, Mt. Joy RD1.

Third place went to Richard Yunginger, son of Mr. and Mrs. Richard Yunginger, Marietta RD1. Richard and his sister, Mary, demonstrated for the Rotarians their methods of selecting berries for exhibition. Mary Yunginger placed fourth in the competition.

Other entrants were Dean Risser, son of Mr. and Mrs. John H. Risser, Ephrata, RD1; Glenn Shenk, son of Mr. and Mrs. Glenn Shenk, Lititz RD2, and James Stauffer, son of Mr. and Mrs. Jay Stauffer, 345 Weaver Rd., Lancaster.

Judges for the event were associate county- agent Arnold Lueck and Raymond Stoner, 1051- Eden Road, a poultry farmer and also veteran strawberry grower.

From The

PA. SENATE SIDE

from Clarence F. Manbeck
of the 48th District

The Pennsylvania Senate has just completed work on legislation setting up a network of military veteran information and assistance centers throughout the Commonwealth. The program is unique in that it brings together under one roof all the agencies that provide services for military veterans.

Already passed by the House, the Senate plan nonetheless must be reconsidered by the House because it has been amended by the Senate. But there is little doubt the plan will finally become law. It is considered essential if veterans are to be made aware of the various benefits available to them.

Currently, many veterans spend weeks and even months going from agency to agency to find out what benefits they qualify for and how to get them.

As a result of what is often a frustrating effort, many veterans give up or fail to even bother and find out what is available to them. Often we lose their potential talent or service trained skills because they can't get the schooling they want or the jobs they are qualified to fill.

The plan has a secondary purpose, but one essential to its long-range development. Officials hope to be better able to poll veterans on their needs and wants, expecting to both contact more veterans under the one-roof plan and to have a better exchange of information between the servicing agencies.

As proposed, the legislation would establish up to 15 centers across the State, the location of each to be determined on the basis of geography and population. Wherever possible, the centers would be located in existing State facilities.

Under the Department of Military Affairs, a staff would be trained. Those selected would have previous experience in counseling veterans and have liaison with veterans organizations, county directors of veterans affairs, the Veterans Administration, State agencies, university counselors and any other groups or individuals who would be instrumental in resolving veteran's problem.

The program also will include a central information office with a Statewide toll free number.

As the State with the third largest population in the nation, Pennsylvania also has a large number of military veterans. In the Vietnam conflict alone, of the 2.5 million men and women who served in the armed forces, almost a half million were Pennsylvanians.

I don't think there is any argument that we owe our veterans every bit of help we can provide them with schooling, job counseling or housing. The plan establishing one-stop information and assistance centers is one of the best ways of doing it.

High Initiation Fee In Looking for Oil

Findlay, Ohio — (HK) — Fifty-six million dollars is a lot to pay for some land nearly 100 miles from civilization and completely covered with water.

But, that's how much Marathon Oil Company recently paid the Federal government for the right to explore for oil and gas on off-shore acreage in the Gulf of Mexico.

Occasionally, the Federal government holds a sale of lease rights to specific off-shore acreage, which in recent years has been in the Gulf of Mexico. Marathon, along with other companies, offers sealed bids for some of these tracts. The winning bidder has rights for five years to search for oil and gas. If successful he retains the rights for as long as commercial production continues.

Off-shore drilling in the Gulf is nothing new for Marathon. In fact, off-shore drilling and related expenses have been taking a substantial bite out of company budgets since the 1930's.

The costs of seeking oil and gas in coastal waters are constantly on the rise. Indeed, one of the fastest-rising of them is the cost of the off-shore acreage itself.

Water and weather combine forces to escalate both risks and overall costs. Today, drilling crews work in waters 400 feet deep, with still greater depths yet to be explored. This poses dangers, and it calls for equipment and technology vastly different from those needed to set up a drilling rig on solid land.

ORGANIC LIVING

By

Robert Rodale

EAT WISELY TO CONSERVE CHROMIUM

The trace element chromium may seem like a rather strange thing to be eating, instead of plating auto bumpers with. But nutritional scientists are gaining new respect for chromium every day. They are discovering that chromium protects against heart disease and diabetes. Unfortunately they are also discovering that Americans are lower on the chromium totem pole than any other people on earth.

I first became interested in chromium about 10 years ago, when Dr. Henry A. Schroeder of the Dartmouth Medical School reported that rats given extra chromium with their food lived longer and avoided buildups of fatty deposits in their arteries. Somehow those rats became immune to the rise in cholesterol levels that normally accompanies advancing age.

Almost simultaneously, scientist Isabel H. Tipton discovered that there were startling differences in tissue chromium levels of people from different parts of the world. Almost all infants start out life with roughly equal body stores of chromium, but from there on levels constantly decline as chromium is excreted through the urine. Only Middle Easterners and Orientals retain high chromium levels all their lives.

The typical American diet can cause a person to lose 11 milligrams of chromium in 30 years. Since we all start out with about 6 milligrams, you can see where that leaves us.

Premature babies, of which more than 200,000 are born each year in the U.S., start life with even less chromium, because they aren't in the mother's womb long enough to accumulate an adequate reserve. Many are extremely prone to cholesterol problems, according to Dr. K. Michael Hambidge, pediatrician at the University of Colorado Medical Center.

What happens to the mother while her baby is building up chromium in her womb? She suffers. Dr. Hambidge found that as many as 71 percent of mothers tested during their last month of pregnancy had low levels of chromium.

The implications of long-term chromium depletion are grave indeed. Dr. Tipton found that almost no chromium at all could be detected in the aortas of Americans dying of coronary artery disease. But chromium could almost always be found in the aortas of Americans dying accidentally.

Researchers have also learned that without chromium, the body's insulin-making mechanism is disrupted. That can lead to diabetes, a disease that is dramatically on the upswing in the U.S.

Why are Americans losing their chromium reserves so rapidly? Dr. Schroeder believes that our diet of highly-processed foods has much to do with it. He has found that refined white sugar and refined white flour have a great deal of their chromium removed: Whole grain flour, on the other hand, is a good source of chromium, and natural forms of sugar such as molasses also contain reasonable amounts.

When those findings appeared, they had a strong impact on my eating habits. I suddenly looked at white flour and sugar in an entirely new light. The reason why they were called "health wreckers" became abundantly clear, and I found new incentive to start baking some of my own bread and making whole-meal corn pones.

Too many people, though, still eat a diet calculated to create a chromium deficiency. "The most efficient and the fastest way to develop atherosclerosis," says Dr. Schroeder in his new book, "The Trace Elements and Man" (Devin-Adair), "is to drink much coffee all day with three or four spoonfuls of sugar and cream; use marmalades and jams on breakfast toast, with sugar thickly spread with cream on processed breakfast foods; eat a couple of ham sandwiches for lunch on white bread, followed by a slab of pie; and for dinner, take large portions of pork with rich gravies, deep-fried potatoes, and a lemon meringue pie for dessert, followed by a sticky sweet liqueur or two. Such a diet will almost surely result in an elevated serum cholesterol, a depletion of chromium, and atherosclerosis."

There is also evidence that chromium decline follows a regional pattern. "The average chromium concentration in liver from Dallas, for example, is less than one-tenth of the average values from the New York or Chicago area," Dr. Walter Mertz told the American Association for the Advancement of Science a few years ago.

Since that time, trace element analysis using human hair samples has become a much more exact science. In fact, you can have a lock of your own hair analyzed for chromium content by this simple and painless method. For more details, write to Chromium Testing, The Soil and Health Foundation, 33 East Minor Street, Emmaus, Pennsylvania 18049.

If you're concerned about conserving your own chromium reserves, you might start by avoiding refined foods like white flour and sugar. Eat whole grains and naturally-sweet foods such as fruit instead.

Not all chromium is alike. When searching for good sources, we have to be aware that some foods may be rather high in chromium, but in a form which is not readily absorbed by our bodies.

Foods containing high-value chromium include brewer's yeast, mushrooms, and pepper. How much brewer's yeast would you need to consume each day to get an adequate supply of chromium? According to Dr. Schroeder, 0.2 milligrams of chromium is the mark to shoot at. To get that much all from brewer's yeast, you would have to eat a quarter of a pound a day, which is impractical. So remember that you also get some chromium from other foods, particularly whole grains, liver, cheese and wheat germ.

Someday scientists may succeed in developing a concentrated chromium food supplement. In the meantime, we'll just have to watch what we eat.

xxx

"Make It With Natural Foods" is a 48-page guidebook that can put you on the road to better eating. For a copy, send fifty cents to Robert Rodale, Organic Living, in care of this newspaper. Please be sure to ask for the booklet by name, and allow at least three weeks for delivery. (Note: Nutritionists and other medical scientists may or may not agree with the assertions made by Mr. Rodale. The views expressed herein are those of the columnist and do not necessarily reflect the opinions of this newspaper.)

FFA To Select New Queen

Pennsylvania FFA members will choose their first state queen during the annual FFA Activities Week June 18 to 20 at The Pennsylvania State University. The Pennsylvania queen will enter national competition during the National FFA Convention and American Royal Livestock Exposition at Kansas City, Mo., in October.

Under new membership rules, this will be the fifth year for girls to be active in FFA programs. Last year some 130 young women took part in FFA Activities Week at Penn State.

New this year among contests will be one for pleasure horse judging. The various contests, a feature of FFA Activities Weeks, will be held the morning of June 19.

Dr. James M. Beattie, Dean of the College of Agriculture at Penn State, will be among the dignitaries welcoming delegates and contestants at a general session in Schwab Auditorium the evening of June 18. The program will include Coleman Harris, program specialist from the National FFA headquarters in Washington, D. C.

Addressing the general session the night of June 19 will be Doyle Waybright of Gettysburg, North Atlantic Regional Vice President of the FFA. The FFA queen will be presented at this general session. This evening program will be held in Recreation Hall.

Business meetings of the State Association of FFA will be held all three days. Awards to contest winners will be made the morning of June 20 at a final general session in Schwab Auditorium, starting at 9:30. Awards will include trips to regional and national contests.

Results Listed For Buck Pull

The second meet of the reason was held last Friday and Saturday nights at the Buck Tractor Pulling Track. Results of the individual competitions are listed below:

5000 lb. Open

1st - Keener Pulling Team, Manheim, Pa., driving a F-20 430 Ford; 2nd - Dale Smoker, Cochranville, Pa., A.C. 180; 3rd - Ivan Barnsly, Laytonsville, Pa., Farmall M.

7000-lb. Open

1st - Banter Bros., La Fontaine, Ind., driving a 40-Coop 427 Chevy; 2nd - Banter Bros.; 3rd - Vernon Miller, Manheim, Pa., Cockshutt 2-440 Dodge.

9000-lb. Open

1st - Banter Bros.; 2nd - Vernon Miller; 3rd - Ed Horman, Union Bridge, Md., IH 1466.

9000-lb. Modified

1st - Banter Bros.; 2nd - Vernon Miller; 3rd - Lester Landis, Lititz, Pa., driving a 55 Massey 2-440 Dodge.

7000-lb. Modified

1st - Banter Bros.; 2nd - Lester Landis; 3rd - Vernon Miller.

9000-lb. Superstock

1st - Harry Griest, Coatesville, Pa., driving a I.H. 1456; 2nd - Donald Thomas, Boonsboro, Md., J.D. 4020; 3rd - Terry Price, Boonsboro, Md., J.D. 4320.

12,000-lb. Superstock

1st - Harry Griest; 2nd - Ed Horman; 3rd - Terry Price.

7000-lb. Superstock

1st - Tony Stauffer, New Holland, Pa., driving a 9006 Deutz; 2nd - Eugene Ulmer, Montuorsville, Pa., 970 Case; 3rd - Elvin Arment, Ephrata, Pa., 5506 Deutz.

Use Caution with Cosmetics

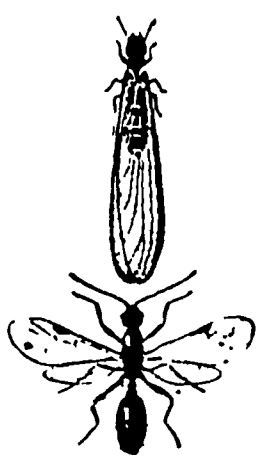
Cosmetics are used on the skin and hair. These are sensitive areas which can be easily infected if mistreated, reminds Mrs. Ruth Ann Wilson, Extension clothing specialist at The Pennsylvania State University. She urges you to note warnings on cosmetic labels and follow instructions carefully. If you believe you've been misled or injured by a cosmetic, report the facts to the nearest Food and Drug Administration office or to your local or state regulatory agency. Seek medical help if you need it. You should also save the rest of the product or container and report what happened to the packer or distributor. If you have a skin infection—see your doctor. Don't rely on a cosmetic to cover it up.

Shearing and Pruning Not the Same

Although the terms are often used interchangeably, there is a difference between shearing and pruning, remind Extension ornamental horticulturists at The Pennsylvania State University.

Shearing is that form of pruning in which all young shoots extending beyond a definite line are cut off. On the other hand, pruning properly involves cutting individual shoots or branches to improve the tree or shrub as your main goal.

TRY A CLASSIFIED



Which Bug is the Termite?

The top one. The bottom bug is a flying ant. Notice its narrow waist. The termite has a broad waist. They're quite different, actually. If you have termites or suspect them in your home, call us.

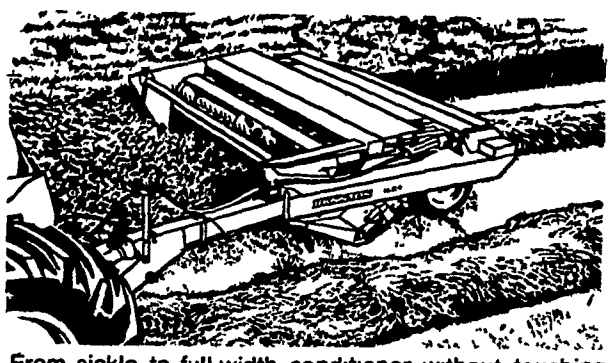
HESSTON
Pure and simple
HESSTON PT-10 WINDROWER



From sickle to full-width conditioner without touching the ground in between. That's the direct feed Hesston PT-10 windrower. What this means to you is cleaner hay, more uniform conditioning, fewer moving parts and greater capacity per foot of cutterbar. You also get the conditioning action that saves the leaves and makes Hesstonized hay possible. And the conditioner rolls adjust to give you more aggressive action in native hay or grasses where leaves are not easily separated. For windrowing at its pure and simple best, see us about the Hesston PT-10.

ED ESHLEMAN'S WASHINGTON REPORT

Any year when congressional elections are on the immediate horizon, you can make a pretty safe bet that someone will begin talking about tax reform.

Of course, everyone favors equalizing the tax burden as much as possible. But, too often, when the talk gets translated into action, the great reform movement ends up putting more of the burden on the shoulders of the average, middle-income wage earner.

What you have to realize is that some of the tax reformers in Congress are interested in something completely different from the prime concerns of the taxpayer. These congressional reformers can get interested in how much additional money will be raised by reforming the tax structure. And when the chief concern becomes more money for the government, the chances are that the middle income guy will be slugged because he's the biggest source of revenue.

All of this is important today because there is a good bit of talk around Congress about tax reform. The Ways and Means Committee in the House is working on a bill headlined as a reform measure.

But is it really? The three major reforms detailed in the legislation are items that benefit one group more than others. Guess Who? — The middle income wage earner.

The committee is talking about eliminating the $150 deduction for medical insurance premiums, the deduction allowed for state gas tax paid and the permissible $100 of dividend earning without tax.

Each of those proposed changes are aimed at the guy who finds making medical insurance payments takes a big chunk out of his budget or paycheck, who can use the gas tax deduction to help meet the greatly increased fuel costs that he faces operating his car today, and who earns a few dollars a year on money he has invested to meet his family's needs.

These proposals will have to rise or fall on their individual merits or lack of them if and when they come before the House for a vote. But I cannot imagine that many average taxpayers are going to be happy about Congress squeezing them a little harder and calling it reform.

There is another tax reform question that is causing a great deal of comment and concern. Many churches and charitable organizations are disturbed by legislation which has been introduced that would eliminate the charitable contribution deduction.

While the concern about that proposal is understandable, in all honesty, there is no need for any panic. Not only do I oppose any such "reform", but I'm confident that the vast majority of House Members are also opposed. There is no chance that church and charity deductions will be knocked out during this Congress.

Weaver Honors Two For 30 Years Service

Willis H. McCarty and Paul M. Wert, received service awards in recognition for the 30 years of dedicated service to Victor F. Weaver, Inc. during a recent award ceremony at the company. The awards were presented by Dale M. Weaver, executive vice president of Weaver.

McCarty, a resident of 819 Grandview Dr., Ephrata, joined Weaver in 1944 as a production worker in Weaver's Egg Department, and later as clerk at one of Weaver's Philadelphia market operations. In 1951 he was named to the position of Live Poultry Buyer and served in that capacity for 20 years, prior to being named to his current position as Production Scheduling Supervisor in 1971.

Wert, a resident of R.D.1, Leola, began his employment at Weaver in 1944 as a production worker in the R. K. P. department, and later was named to the post of R. K. P. foreman. In 1948 he joined Weaver's Egg department and served as a truck driver, department foreman, egg buyer-salesman, and field representative. Currently, he is serving as a serviceman in the truck garage of Weaver's Equipment, Inc.

17-Year Locusts Spotted in Pa.

Brood XIV of the periodical Cicada has checked into the southern tier of Pennsylvania right on schedule. Better known as 17-year locusts, a male of the species was captured Memorial Day weekend in Cumberland County by a botanist with the Pennsylvania Department of Agriculture.

The periodical Cicada is unique among all creatures on the earth as it has the longest reproductive cycle, exactly 17 years. Each year, with another brood having reached an advanced pupal stage, the Cicada return from deep underground, where they have wintered and summered for the past 17 years. They quickly shed their skins for the last time and emerge as adults.

These annual crops of adult Cicadae are identified as Broods, I through XVII. Only eight of the broods are big enough to be catalogued by the Bureau of Plant Industry. The largest, Brood X, will not re-appear until 1987. But this year's brood, XIV, is in a close race with Brood II, as the second-largest. The latter will be back in 1979.

The 18-county area with the heaviest infestations for 1974 includes Adams, Bedord, Berks, Blair, Clearfield, Clinton, Cumberland, Franklin, Lehigh, Luzerne, Montour, Northumberland, Potter, Snyder, Schuylkill, Tioga, Union and York.

Despite the menacing spector of the huge numbers of the large insects and the deafening shriek of the male of the species, the emergence of large numbers of periodical Cicadae presents a threat only to tree fruit growers.

The adult Cicada neither eats, bites nor stings. However, their peculiar egg-laying ritual takes its toll in the yield of mature fruit trees and may kill or permanently stunt young nursery stock. The females cut a series of slits in the twigs of trees in which they deposit their eggs. Thus weakened, the twigs will eventually wither and snap in the wind sharply curtailing the harvest of fruit. However, this activity presents no problem to other forested areas.

The eggs hatch as nymphs about six weeks later and fall to the ground to begin burrowing underground where they'll spend the next 17 years. Another distinct race of the periodical Cicada, limited primarily to the southeastern quandrant of the United States, completes its reproductive cycle in just 13 years.

While large numbers of the Cicadae worry fruit farmers and annoy everyone else, the emergence of a brood in a given area signals a time of plenty for birds and other creatures of the wild who include insects in their diet. Even pet dogs and cats look upon the Cicada as a tasty morsel.

Some people believe that "hot cross buns" will keep for a year without becoming moldy, and hang them up for good luck!

USDA Suspends Firm's License

Brel's Foods, Inc., of Philadelphia, Penna., has been declared ineligible to operate in the produce business under the Perishable Agricultural Commodities Act (PACA), the U. S. Department of Agriculture (USDA) announced.

According to USDA's Agricultural Marketing Service, the firm's license was suspended May 17 following failure to pay a reparation award of $5,707 to a New Jersey wholesaler for seven lots of potatoes and onions purchased during April, 1974.

The firm answered the charges but based on the evidence submitted, USDA ordered payment of the full amount claimed. The firm may not resume operation under the PACA until the award is satisfied and approval is gained from USDA.

Also, the firm's officers, directors, and holders of more than ten percent of the stock may not be employed or affiliated with any licensed firm without USDA approval. The officers, directors, and stockholders of Brel's Foods, Inc. are Lilliam Feldman, Sandra Feldman, and Robert Feldman.

PACA established a code of good business conduct for the produce industry. It requires licenses for interstate traders in fresh and frozen fruits and vegetables and authorizes USDA to suspend or revoke a trader's license for violating the Act.

She can't afford to eat hay.
And you can't afford to feed it.

If she is under two months of age, a dairy replacement heifer should have no hay whatsoever in her ration. Hay is too difficult for her underdeveloped rumen to digest. Hay doesn't have the nutrition required for proper growth and development; it takes up rumen space that should be filled with a high quality feed such as Purina Calf Startena.•

No, a very young dairy replacement heifer can't afford the shortcomings of hay. And neither can you — if building maximum milk production is your goal.

Would you want to jeopardize Calf Startena benefits? When fed as recommended, Calf Startena provides a "just right" balance of nutrients. Its low-fiber, high-energy formula is more easily digested, and at the same time it stimulates papillary development in the rumen. In addition, improved growth and feed efficiency are helped by a proven antibiotic additive.

Your Purina dealer has some mighty interesting facts about the superior performance of Calf Startena, including test results which show a 19 percent faster growth rate for heifers fed a hay-free ration. Be sure to see your Purina dealer — and this important information — before you start that next group of replacements.

YCC Funding Announced

Final arrangements for funding the state Youth Conservation Corps pilot program were announced recently by Secreatary of Agriculture Earl L. Butz and Secretary of the Interior Rogers C. B. Morton.

Now going into its fourth year, the Youth Conservation Corps (YCC) program will this summer for the first time include state-operated projects in addition to the 178 conservation corps camps on U.S. Department of the Interior's Bureau of Indian Affairs, Bureau of Land Management, Bureau of Reclamation, Bureau of Sports Fisheries and Wildlife and the National Park Service.

For this first summer of state participation in the YCC program, $3 million in grant funds have been made available to the states for cost-share projects on non-federal public lands and waters. Grants have been awarded and all available grant funds obligated, the two secretaries said. They emphasized that youth selections for the 1974 season have been made and all programs are filled.

Forty-six of the 50 states will be conducting camps this summer, according to the secretaries' announcement. Only the states of Alabama, Hawaii, Oklahoma and South Carolina will, because of previous commitment of funds for other ongoing programs, be unable to participate. In addition to the participating states, the District of Columbia, American Samoa, The Virgin Islands, Guam, Puerto Rico and the Trust Territories of the Pacific Islands will also operate YCC projects.

About 5,000 young men and women will be employed for eight weeks at some 150 state YCC projects throughout the nation, starting in mid-June.

The secretaries pointed out that the YCC program is designed to fill the following basic needs: (1) accomplish needed conservation work on lands; (2) provide gainful employment for young citizens from all walks of life; and (3) develop in participating youth an understanding and appreciation of the nation's natural environment and heritage.

Growing Degrees, Rainfall

A report from Penn State of weekly crop and weather round-ups with a report on weather conditions for the week ending June 3.

In Lancaster, the average temperature for the week was 60 degrees, 7 degrees below the normal average for the time of year.

Growing degree days for crops that start at 40 degrees totaled 1136 degree days, 124 more than the normal average. For crops starting at 50 degrees growing degree days totaled 552, which is 100 more than average.

Rainfall for the week was .74 inches. Rainfall measured from April 1 was 9.28 inches, 1.42 inches more than the normal average.

Chough birds were protected in Cornwall because the soul of King Arthur was fabled to have migrated into a chough.

Sew Your Own Sports Equipment

The home sewing boom now includes making some of your own sports equipment. How about making you own tent, sleeping bag, duffel bag, or camping outerwear? Kits are available for thermo vests, weather-all ponchos and rainpants, and all types of equipment for the hardy outdoor enthusiast.

Mrs. Ruth Ann Wilson, Extension clothing specialist at The Pennsylvania State University, points out that a Minnesota company developed the kits and is conducting training classes. With modern textile developments, it is possible to obtain new lightweight outer fabrics, light-weight insulation of man-made fibers, sturdy zippers and buckles. These are easy to work with, and the company has developed kits for garments and accessories suitable for home sewing machines.

Mrs. Wilson says you can save about half the cost by making your own outdoor wear since labor usually accounts for at least half the cost of most textile garments and items.

Fabrics and materials for these kits are selected for water repellency, warmth, color-fastness, strength, suitability and rot resistance. Most of the materials are washable.

The Extension clothing specialist explains that making such items offers several construction advantages–there are no fitting problems, no dart or tucks–just straight simple sewing on non-stretch fabrics.

Check fabric and sewing centers in your area for these new sporting goods kits you can sew yourself.

Caddies or Carts?

It is interesting the way carts have replaced caddies on many golf courses. There are three big advantages to using the carts, however: They don't cost,, they don't criticize, and they don't count.

Meat And The Budget

Meat makes up nearly 40 percent of the average family's food expenditures.

Fulton Grange No. 66

Fulton Grange Number 66 will observe June Dairy Month by holding their annual homemade ice cream and strawberry night at their regular meeting June 10, 8 P.M. Mrs. Doris Thomas, Extension Home Economist of Lancaster Co. will speak on "Food Prices", Mrs. Owen Groff will give a monologue and there will be other special features. The committee in charge of making the ice cream is Mrs. J. Everett Kreider, Mrs. Harold Alexander, Mrs. Donald Trimble and Mrs. Clayton J. Metzler.

Charles McSparran, Master, presided at the regular Grange meeting May 27 when a $25. donation was voted to Teen Haven.

Miss Joyce Galbreath, Lecturer, presented the following program: Reading by Mrs. Charles Tindall Sr.; The Master spoke about Peter Fry's Grange membership and dedicated a Grange rug to his memory; (The rug was presented to the Grange by his family.) Group Singing "Nearer My God To Thee"; Dedication prayer by C. G. McSparran.

The Lecturer then presented the annual memorial program in memory of Paul H. Uible, Leslie I. Bolton, Mrs. Mary Giffing and Peter Fry: Group singing "Lead Kindly Light"; prayer by the Chaplain, Gyles Brown; vocal solo "Abide With Me" by Miss Peggy Galbreath; Reading "Life Is Forever" by Mrs. DeWitt Bacorn and decoration of the altar with flowers by the officers led by the Assistant Stewards, Miss Peggy Galbreath and Arba Henry. Group singing "In The Garden." Scripture reading by the Chaplain; piano solo "The Lord's Prayer" by Glenn Hough. Memorial address "The High Use Of Memory" by the Rev. Roy Townsend, pastor of the Lititle Britain Presbyterian Church.

Youth Night will be observed June 24.

Venessa Buckwalter Named To Weaver Personnel Post

Venessa A. Buckwalter, 544 E. Main St., New Holland, has been named to the newly created position of employee benefits supervisor with the Personnel Department of Victor F. Weaver, Inc., New Holland, Pa.

A graduate of Millersville State College with a B.S. Degree in German and education, she joined Weaver in 1970 as an insurance clerk.

In her new position Mrs. Buckwalter will be responsible for the administration and development of employee benefit programs as well as assisting in wage administration programs.

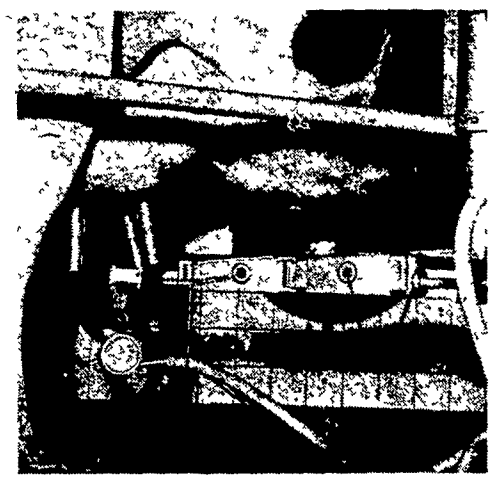
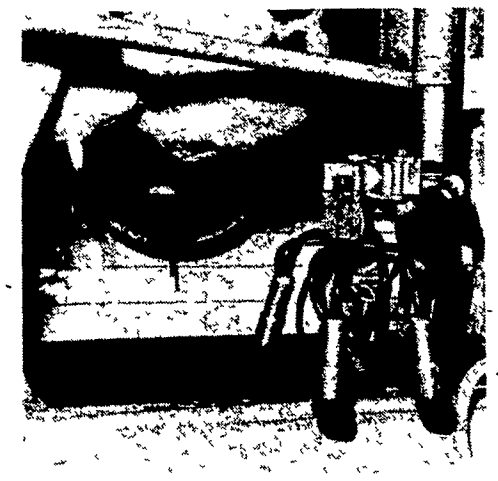
AUTOMATIC DETACHERS




THE TRUE TAKE-OFF
True to your needs. True to the cow's. That's Dari-Kool Bou-Matic Automatic Teat-Cup Detachers. With them, one man can milk more cows per hour. Many more. Milk 'em better too. After the udder is prepared, he easily attaches the milker unit. The rest is automatic. When the milk flow stops, vacuum shuts off. Milker units are gently removed from the udder and swung out of the way, ready for the next cow. No under-milking. No over-milking. That's the true take-off for truly professional milking. From Dari-Kool Bou-Matic, the professional milking systems. And your Dairy Equipment Company dealer.

From Local Ag Teachers:

Thoughts in Passing

The article this week was prepared by Glenn L. Spangler, teacher of agriculture at Manheim Central High School.

Managing Forage Crops

With today's protein prices, it pays to properly manage your forage crops. With good management practices you can increase the yearly per acre value from $200-acre to over $300-acre.

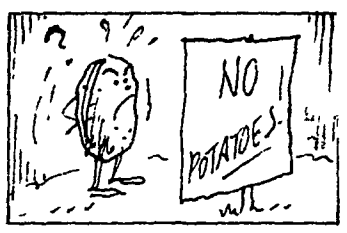
Right now is one of the most critical times of the year for forage management. With first cuttings of alfalfa being completed it is time to seriously consider top-dressing your fields. An 0-35-105 applied, both after first cutting and in the fall can help to change an average 3 ton-acre yield to a 5 ton-acre yield. Also 2 pounds of boron per year should be applied to increase yield. Phosphorous level is of special importance, because low levels are a major reason for low yields. Also by splitting the fertilizer application potash can be used more efficiently.

Besides fertilization, there are other management practices which will help you. Insect control is becoming a major problem this year in alfalfa. Many fields will have to be sprayed for alfalfa weevil. Later this season you should check your field for leaf hoppers. Weeds are also problems in many fields. Measures should be taken to control weeds especially in new seedings, because they will rob your alfalfa and forage grasses of water, nutrients and return a poorer quality product.

Timing of cutting is important for two reasons. Protein content drops as both legumes and grasses mature. While in the bud stage alfalfa's protein is near 20 percent and it drops to 16 percent in the full bloom stage. Likewise, grasses protein drops from 18 percent in the vegetative stage to 7 percent in the dough stage. Considering only first cutting, 50 pounds of actual protein per acre is lost by waiting from 1-10th bloom to full bloom to cut your alfalfa. The loss of protein per acre by waiting to cut grasses would be much greater. Secondly alfalfa should not be cut too early. Cutting too early decreases yield, but more important is the fact that it depletes the root reserves. Subsequently this will increase the chances of loss due to winter kill and insect and disease damage.

Things to Remember When Managing Forage Crops

1. Topdress alfalfa with an 0-70-210 and 2 pounds of boron split after first cutting and in the fall. Topdress fields with less than 30 percent alfalfa with a 50-50-50 in the spring. Note: (When seeding a field to forage take a soil test and make certain that pH is at the correct level; otherwise fertilizers will not be as available).
2. Harvest alfalfa in very early or early bloom stage. Grasses just as heads are emerging from the boot.
3. Check fields for insects and use proper control measures.
4. Control weeds to maintain quality forage.



Potatoes in 1728 were forbidden by law in Scotland because the potato was an unholy plant of the nightshade family and not mentioned in the Bible.

Old Clam!

A 570 million-year-old clam, 70 million years older than any previously known, has been discovered near Schodack Landing, ten miles south of Albany, New York.

30% Fat Limit On Beef Sausage

The U.S. Department of Agriculture (USDA) announced that it will retain the 30 percent limitation on fat content in federally inspected "beef sausage."

In a notice to be published in the May 29 Federal Register, USDA announced that it will fully enforce the 30 percent fat limitation on beef sausage beginning July 29. The 60-day delay will allow processors time to make necessary adjustments in production and quality control to bring their products into full compliance.

In October 1973, USDA asked for public comments (USDA press release 3142-73) on its tentative decision to reject industry petitions for raising the fat content limitation on beef sausage from 30 to 50 percent. Most comments received agreed with this rejection, according to officials of USDA's Animal and Plant Health Inspection Service (APHIS).

Standards for beef sausages – announced on October 3, 1970 – included a maximum fat limit of 30 percent. Full enforcement of this limitation has been delayed pending an appeal by some processors, principally on the West Coast.

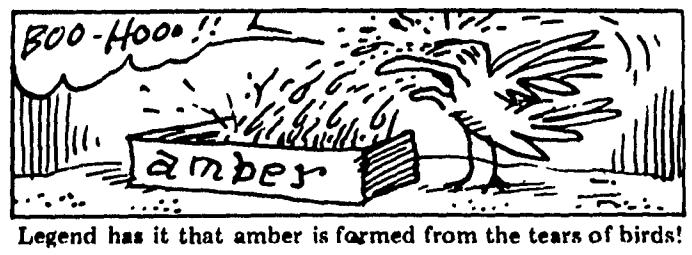
APHIS officials explained that they had received requests from some federally inspected processors to raise the fat limitation to 50 percent. The processors contended that the 30 percent limitation adversely affected the taste and texture of the product, and therefore lessened its appeal to consumers.

USDA rejected the petitions on the basis of a subsequent review of beef sausage, which indicated that:

Products labeled as "beef sausage" have not, by tradition, adhered to a consistent standard for fat content.

If such a standard permitted more than 30 percent fat, this would permit the term "beef sausage" to be used on packages of excessively fat ground beef, which otherwise should be identified as imitation hamburger."

A product made from beef and containing more than 30 percent fat can be labeled "breakfast sausage," which many consumers know to be an uncured sausage containing a significant quantity of fat.



Legend has it that amber is formed from the tears of birds!

Tanning Time

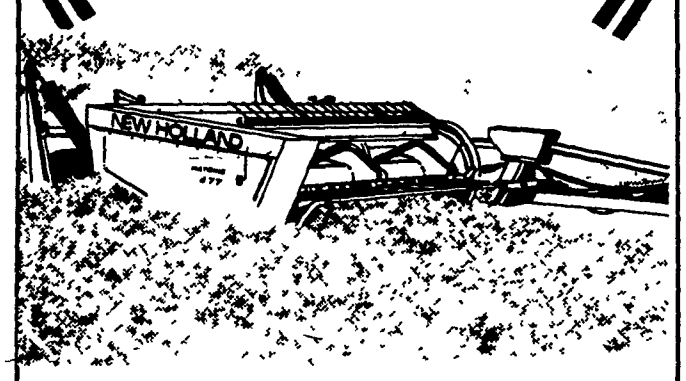
Summer is here and you've made up your mind that this year you're going to get the best suntan you've ever had in your life. Good, but if you try to do it in one weekend, your skin will change color – to a bright fiery red.

Sunburn, apart from being painful, can also cause damage to your skin and bring on wrinkles that you don't want.

To get your tan without first suffering through a painful sunburn begin your exposure to the sun gradually. Start your first day in the sun with about 15 to 20 minutes exposure on your face and then the same amount on your back. You can then extend that period in the sun each day. Exposure time can be increased by about one-third every day. In other words, you can extend exposure time to about 20 minutes the second day and then to about a half hour the third day.

If you follow these suggestions, you should have a sufficient tan in a week to protect yourself from burning. But remember too, that even on a cloudy day it's possible to burn yourself severely. And wind as well as sun can cause a painful burn.

NEW HOLLAND
MOWER-CONDITIONER
INTERMESHING RUBBER ROLLS



Intermeshing, high-speed rolls (which practically eliminate plugging) and the fact that both rolls are rubber (which treats the crop with leaf-saving gentleness) help account for the fact that more farmers buy Haybine® mower-conditioners than any other kind.

Lasso® plus atrazine tank mix...gets the foxtails and lots more grasses. Lots of broadleaves, too.

Lots of grasses and broadleafs growing in corn mean nutrients and moisture going to waste. Your corn has to grow with "leftovers."

To give your corn the "full course" it needs, tank mix Lasso plus atrazine To take care of the grasses like the foxtails, smartweed, and others And to get pigweed, smartweed, and other broadleaves If rotation to soybeans is how you want to go, Lasso plus atrazine is the way to go Because you use less atrazine there's less chance of carryover problems to next year's beans.

That's what you expect from your herbicide!

Thomasville 4-H Club

The Thomasville 4-H Club met May 28, 1974 at the 4-H Center. Pledges were led by Sandra Borror and James Roth.

Laurie and Lisa Dobrosky gave a demonstration on "Kitless Candles." Jeff Roth gave a health demonstration, "In-Vite-Am-In." Tammy Barnhart reported on Rural Life Sunday. Our club worshipped together at the West York Church of the Brethren. Members who participated in the service were Reuben Parr, Jack Parr, Bonnie Wire, Tammy Barnhart, Tim Eisenhart, Kelly Krebs, Gary Welsh, and Tommy Welsh. Tim Eisenhart reported on his trip to the Capital Region 4-H Teen Leader Retreat.

Awards for cookie sales were presented to Bonnie Wire, Tim Eisenhart, Kelly Rentzel, and Jeff Roth. Paul Myers received a check for the flower bulb sale.

Officer Daniel Garber of the Nothern York County Regional Police talked on "Drug Abuse."

Tommy E. Welsh

CUTRINE Made The Difference

Lakes and ponds like the one above (left) needn't be spoiled by the odor and scum of algae or threatened by the harmful, even lethal, effect it can have on fish, animals and humans.

CUTRINE, used as directed, controlled the algae in the pond (right) in just a few days.

CUTRINE can make the difference in your lake or pond. It has been thoroughly tested and proven in actual field use. CUTRINE is registered by the Environmental Protection Agency for use in fish, farm and fire ponds; lakes; fish hatcheries — even in POTABLE WATER RESERVOIRS.

4-H NEWS

4-H'ers Submit Blue Forms

Any Lancaster County 4-H member who is over 14 years of age and has completed at least one year of 4-H club work is eligible to submit a Pennsylvania members Record (Blue Form) to be entered in the National Awards Program.

The 4-H member must have completed a project in the programs entered. Some of the programs include beef, clothing, dairy, foods-nutrition, horse, photography, poultry, sheep, swine and veterinary science.

Blue forms are a detailed report of the 4-H'ers career experiences in 4-H. The offices, activities, round-ups and projects that he has participated in are included. The member also writes a 4-H story which should tell how he has personally developed through involvement in 4-H.

Blue Forms are judged at the county, state and national levels with the highest scored records continuing on. County winners will receive medals, state winners will receive trips to National 4-H Club Congress in Chicago, and national winners will receive scholarships of varied amounts.

Everyone is encouraged to try for these awards and may receive more information by calling the Extension Office at 394-6851. Blue Forms are to be turned in by June 14.

County Council To Host Skating Party

The Lancaster County 4-H Council will be hosting a roller skating party at the Overlook Skating Rink on Tuesday, June 11 from 7:00 to 10:00 p.m. This will be an evening of fun for all 4-H members and friends. Admission is $1.00 and 50 cents for skates.

The next County Council meeting will be held June 19 at 7:30 p.m. at the Farm and Home Center. Raelene Harbold, Lancaster County Dairy Princess, will speak.

The Executive Committee will meet before the meeting at 6:30 p.m. All county 4-H'ers are invited and encouraged to attend these events.

Tornadoes

Tornadoes are an American specialty, striking more often in this country than in any other. A rare twister ravaged a London suburb in 1950, and they have also hit Canada, Africa, Australia, New Zealand and Central Asia. Their primary severe storm belt known as "Tornado Alley" cuts through the American Midwest.

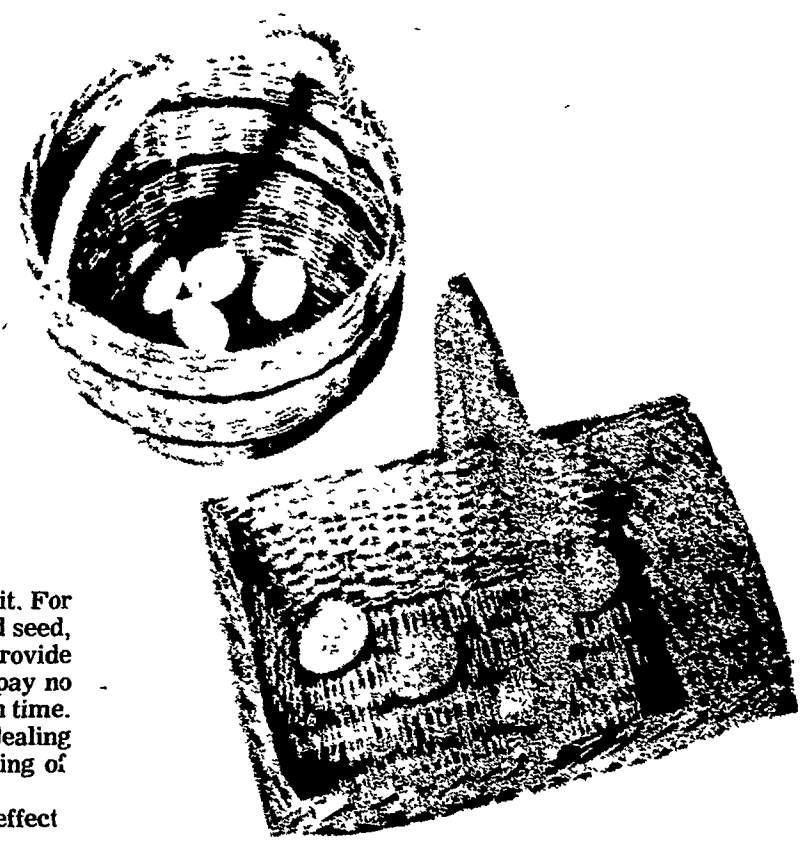
FARM CREDIT SERVICE

There is a time when it doesn't pay to have your eggs in too many baskets.



There are certain advantages to be gained by centering your farm credit needs at Farm Credit. For example, if your plans for the year ahead include a new piece of equipment, spring fertilizer and seed, and perhaps an improvement to your farm home, you can arrange now for a Farm Credit loan to provide the total amount you will need. You can draw on these funds as you need the money. You will pay no interest until the money is actually in use. And then, only on the actual amount in use at any given time. In addition, by centering all your credit needs at Farm Credit, you will have the convenience of dealing with one source, the security of knowing cash will be available when needed, plus the cost-saving of Farm Credit's reasonable interest charges.

Why not discuss your plans with Farm Credit now. Then when the time comes to put them into effect the necessary funds will be waiting for you.

Linda Welk Lawrence . . .

Former Dairy Princess Recalls Pageant Excitement

By Sally Bair
Lancaster Farming
Feature Writer

Pretty, vivacious Linda Welk Lawrence was Lancaster County's Dairy Princess in 1965. Now she is a successful businesswoman, housewife and mother, and she graciously took time to reflect on her year as Dairy Princess.

Her advice to young eligible dairy farm girls is to enter the contest, "because they have everything to gain and nothing to lose." She said, "Even if nothing else, they all receive lovely gifts which makes the effort worthwhile."

She said she thinks it is a valuable program because it is a competition which is "strictly between farm girls, and that doesn't happen too often. Also you're judged strictly on what you know and what you do."

For the winner, there is the excitement of participating in the state contest, as well as making appearances throughout the year. The state contest at that time was held at various cities around the state and in 1965 Linda got to travel to Towanda. She remembers having a "very full schedule with dinners, banquets and personal interviews."

But one thing she says she'll never forget is her sailing experience with three other Dairy Princesses. For relaxation one day four of them were placed on a sailboat and became stranded in the middle of the lake when the wind died. Two young Sir Galahad types rescued the damsels in distress and they were able to continue with their duties at the contest.

And just to keep things from getting dull at the state contest, there were three Lindas that year - a little confusing to all concerned. All in all, Linda says, "It was a terrific experience."

When Linda was in the county contest it was still being held at the Host Town, which Linda described as "very elegant - it has atmosphere plus! I really felt like a princess that night!"

She also remembers that a Guernsey cow was tied outside the motel to publicize the event. "With all the tourists around, we really got a lot of questioning looks, but it was great publicity for the contest."

She said it was a surprise for her to find that most of the contestants on the state level had not gone through a pageant on the scale of Lancaster County's. Having been through one really helped her not to be overwhelmed by the state contest, she said.

Linda Welk Lawrence pours nature's most perfect food for her daughter Christina.

A rose is a rose . . . here Linda cuts one from her many lovely bushes.

Linda is now a manager for Princess House products, having started parttime for them eight years ago. She attributes a great deal of her success to the poise she gained while serving as Dairy Princess. She said, "Being Dairy Princess helped me learn to carry on a conversation and learn to make other people feel at ease."

She had nothing but praise for Mrs. Rhelda Royer who was coordinator for the contest at the time. She said, "Mrs. Royer was like a mother to me while I was a Dairy Princess, and we still go to visit her. If I had any questions she would help me with them, and we developed a very close relationship."

Linda said, "We went quite a bit. Mrs. Royer always saw that I went whenever there was an opportunity to speak. At first I was scared to speak to groups. I prepared my own talks, and often as we were driving I would give her the talk in the car and she would make suggestions. Since I had been given a wardrobe, Mrs. Royer would often suggest what I should wear on various occasions."

Linda appeared at most of the county fairs, "mostly on dairy judging day" and attended Field Days and Grange meetings. She spoke to the Elks and to several 4-H clubs. To help her remember all the fun things she did as Dairy Princess, she faithfully kept a scrap book which contains souvenirs of each of the places she spoke. She was even able to go out of the county on several occasions to make appearances.

What kind of girls makes a good Dairy Princess? According to Linda, "I see her as a girl who should definitely have some knowledge of the dairy business. She should want to publicize milk and be willing to be active, or she has no business entering the contest."

Getting the dairy industry's story across to consumers is a tough job, Linda said, but she feels that getting into schools and talking with school children would be a good way of getting to the parents. "I would love to see the Dairy Princess involved with school children up to junior high. So many children want soda today instead of milk, that encouragement is needed from an early age."

She has managed to attend several pageants in recent years, and Linda says, "They haven't really changed." She recalled having an informal luncheon with the judges the day of the contest, "so they could get to know us a little better. It helped put us at ease for the evening program. We were interviewed by Harry Kauffman who made us feel so much at ease. We had to pick a word from a card and explain it - something like honesty or integrity, and he also asked us a question on dairying."

'I had had no experience. I was very flabbergasted when they announced my name as winner," she recalls.

Linda is the daughter of Mr. and Mrs. Leroy Welk, Strasburg RD1, who owned a herd of Registered Holsteins at the time, so she could answer the dairy questions handily. She also was a member of the 4-H Holstein Club for nine years and owned 13 dairy animals, "some of which were good show animals." She said she showed the Junior Champion at

Dairy Princess (Continued from Page 24)

Round-Up her first year in 4-H so that was great incentive to continue. She also belonged to the Baby Beef Club for two years.

Linda admits, however, that with six brothers and one sister, she got out of most of the hard farm work. But caring for 13 animals assured her of some knowledge of farm work. She says she still loves working outdoors and misses farm life.

Linda, whose husband Bob is a member of the Lancaster City Police force, lives west of Lancaster, and her time these days is taken up mostly in caring for her 2½ year old daughter Christina. The Lawrence's are expecting another addition to the family at the end of July.

As a manager for Princess House, Linda still conducts about two shows a week, at which she demonstrates their products. But she also trains other women who conduct their own demonstrations. Currently she has four girls working under her. She describes the gifts available through Princess House as "her traveling gift shop." She says the job is the "best thing for a housewife and mother because it takes only one or two nights a week and earns considerable income."

A graduate of Lampeter-Strasburg High School, Linda worked for Educators Mutual Life Insurance Company upon graduation, after going through a training program with them while still in school. She then worked for Dr. John Polcyn, the neurosurgeon, for three years. Her skill is stenographic work.

Linda doesn't have much time for hobbies, but her well-tended flower gardens show how she spends much of her spare time. She said she loves to garden and can, something she does in cooperation with her mother.

Although her parents have sold their dairy animals, Linda keeps close to the dairy industry through her two brothers who are dairy farmers. She said, "I think the future for dairying is bright. But it is not an easy road, and young people need to be willing to stick with it."

The June is Dairy Month celebration will be highlighted in many counties with the crowning of a 1974 Dairy Princess. If Linda Lawrence's recollections are a guide, each Princess will have a year filled with excitement - and duty - to look forward to.

Farm Women Societies

Society 6

Farm Women Society 6 met Saturday, June 1, at the Elizabethtown Church of the Brethren where they entertained Society 22 and the county officers. The meeting opened with the theme song "Brighten the Corner Where You Are".

James Weldon Johnson's "Story of Creation" was used for devotions by Muriel Saylor. Members named their favorite cake in answer to roll call, after which guests were introduced. Janet Miller of No. 22 and Bertha Keller of No. 6 presented with glass baskets of strawberries. Each was a charter member of her society.

Vocal numbers "Stranger of Galilee" and "Thank God for a Garden" were presented by Mary Forney, Sara Steelman, and Margaret Dotterer, accompanied by Grace Brown.

The speaker of the afternoon was Richard Warren who is a member of the Lancaster Toastmaster's Club. His program consisted of slides and interesting comments about covered bridges of Lancaster County.

Refreshments were served at beautifully decorated tables by the hostesses: Mrs. Milton Eberly, Mrs. Clayton Hollinger, Mrs. E. Musser Heisey, Mrs. Mary Shaffer, Mrs. Earl Wittle, and Mrs. Martha Eshleman substituting for Mrs. Mae Gantz.

The July 6 meeting will be held at the home of Mrs. John Wagner, R.D.1, Bainbridge.

Society 27

Farm Women Society 27 held their May meeting at the home of Mrs. Luke Brubaker. Mrs. Robert Fellenbaum was co-hostess. Mrs. Arthur Wenger led the devotions.

For the Roll Call each member told about the pleasant visit they had earlier in the evening with an elderly friend.

The members voted to give a donation of $50.00 to the Lancaster County Jaycees.

Society 11 will be hosts to Society 27 on June 27 at 12:00 at Huffnagle Park, Quarryville.

Society 29

Farm Women Scoiety 29 along with relatives and friends enjoyed a bus trip to Winterthur on Wednesday, May 22. They enjoyed a walk through the gardens but of special interest were the restored rooms in the Museum. The Society also visited the Brandywine River Museum and to day complete had time to shop at Exton Square.

The next meeting will be held June 17 at the home of Mrs. John Heisey.

Farm Women Calendar

Saturday, June 8

1:30 p.m. - Farm Women Society 19 meeting, home of Mrs. Henry Lehman, RD1, Manheim.

Home On The Range

This week a reader requests an old recipe for bread. She says, "I've been looking for a bread recipe in which you use potato water and a sugar liquid . . . each day you add the water from the boiled potatoes to the start you have in the jar and add a teaspoon of sugar which ferments. When you bake you use this mixture in place of yeast cakes."

Another reader would like suggestions for greaseless donuts.

Can anyone assist with these unusual requests?

Remember ladies, this is June Dairy Month. Gear meals and desserts toward dairy products - a good way for children and adults alike to get needed nutrition.

xxx

Raisin Filled Cookies

2 cups light brown sugar
½ cup shortening
2 eggs
1 cup sweet milk
1 teaspoon vanilla
1 teaspoon soda
2 teaspoon baking powder
4 cups flour

Cream together sugar and shortening. Add eggs and vanilla. Sift dry ingredients, alternately with milk.

Filling

Cook until thick (make first and let cool):
1 cup raisins, put through grinder
1 cup sugar
½ cup water
1½ tablespoons flour

Mix and cook till thick.

This is a drop cookie. Drop one level teaspoon filling on cookie sheet, then bake in 375 to 400 degree oven. Ice with vanilla frosting.

Mrs. Edwin Nolt
East Earl RD2

xxx

Stir Drop Chocolate Chip Cookies

6 eggs
2 cups melted shortening
6 teaspoons vanilla
2¼ cups sugar
1 cup milk
6 cups flour
6 teaspoons baking powder
1½ teaspoons salt
1 12 ounce package chocolate chips

Drop by the teaspoonful and bake at 375 degrees.

Judy Hursh
RD1, Ephrata

xxx

Boiled Cookies

Combine in saucepan:
2 cups granulated sugar
3 tablespoons cocoa
½ cup oleo
½ cup milk

Bring to a boil. Boil 2 minutes. Stir. Add:
½ cup peanut butter
3 cups uncooked rolled oats

Stir well. Drop by teaspoonfuls (when cool) on wax paper.

Mrs. Harry Bear
Lancaster, Pa.

xxx

Rhubarb Custard Pie

1 egg
1 cup sugar
1 cup milk
1 teaspoon vanilla

Mix this together. Into an unbaked pie shell put 2 cups thinly sliced rhubarb. Add milk mixture and bake at 375 degrees like any custard pie.

Anna M. Shirk
RD2, East Earl.

xxx

Sea Foam Icing (Easy to Make)

1 ½ cups firmly packed brown sugar
2-3 cup water
1 tablespoon syrup (dark preferred)
2 egg whites
1 teaspoon vanilla

Boil the first three ingredients until a firm soft ball stage.

Beat the egg whites until stiff. Pour the hot syrup in a thin stream over the egg whites, beating hard all the while. Add vanilla and beat until the icing forms peaks. Spread on cake.

Edna M. Brubaker
Denver Route 1

xxx

Jelly Roll

3 eggs
1 cup flour
1 teaspoon baking powder
1 teaspoon vanilla
½ teaspoon salt
3 tablespoons cold water
1 cup sugar

Miss Cora Burkholder
R.D.1
Kutztown

xxx

Sour Cream Pie

1 cup brown sugar
1 cup sour cream
1 cup sour milk
1 cup molasses
2 eggs
4 tablespoons flour
1 teaspoon soda

Mix everything together. Bake until set.

Mrs. Ivan Hoover
R.D.1
New Holland

xxx

Molasses Coconut Pie

Stir:
2 eggs (beaten)
¾ cup light brown sugar
1 cup molasses

Add:
2 tablespoons flour
½ teaspoon soda
¾ cup milk
½ cup cream
1 cup coconut
2 tablespoons butter

Makes one nine inch pie.

Catherine Shirk
Ephrata, RD3

xxx

Camp Vanilla Pie

Bottom:
1 cup sugar
1 cup molasses
1 cup water
1 egg
1 teaspoon vanilla
1 teaspoon baking powder

Top Dough

2 cups sugar
½ cup lard
1 egg
1 cup thick milk
1 teaspoon soda
2½ cups flour

This makes five 8-inch pies.

Miss Elva Zimmerman
R.D.1
Stevens

Cheesecake Crust Pie

Cream together:
4 tablespoons butter
4 tablespoons sugar
1 egg, beaten
1 cup flour
½ teaspoon baking powder

Make a soft dough, smooth into 9-inch pan

Filling

8 ounce package cream cheese
½ cup sugar
1 tablespoon flour
1 tablespoon each lemon juice and vanilla
1½ cups milk

Mix well. Fold in stiffly beaten egg whites, sprinkle with nutmeg. Bake 45 minutes in 350 degree oven.

For Super Flavor and Fun, Too, Make Your Own Ice Cream

June is for spooning homemade peach ice cream into a dish with more peaches or what-have-you. Take the ice-and-salt-packed ice cream out to picnic or beach for a special treat, making sundaes or cones.

Your very own ice cream is fun to make and tastes like nothing else you've ever had. It's especially good to make it in the good old summertime when there's a wealth of fruit and berries.

For peach ice cream perfection, mash the peaches as fine as possible while still retaining some of the original character. This gives an even distribution of the fruit in the ice cream as well as a better texture. Mashing the fruit will also prevent the dasher blades from clogging.

PEACH BUTTERMILK ICE CREAM

1 tablespoon (1 envelope) unflavored gelatin
1 cup sugar
2 cups buttermilk
1 egg, beaten
1 4 teaspoon salt
4 cups whipping cream
1 tablespoon vanilla extract
2 cups mashed fresh peaches
1/4 cup sugar

In saucepan combine gelatin, sugar and buttermilk. Dissolve gelatin and sugar over low heat, stir occasionally. Gradually add hot mixture to egg, stirring constantly. Stir in salt, cream and vanilla. Combine mashed peaches and sugar, add to mixture. Chill. Churn-freeze.

NOTE. If fresh peaches are not available, mashed, canned freestone peaches may be used. Do not add sugar to peaches. Regular milk may be substituted for buttermilk in the recipe. Yield approximately 3 quarts.

Farm Women Board Meets

The Executive Board of the Lancaster County of Farm Women attended a meeting Monday, June 3 at the home of Mrs. Paul Kurtz, Lititz RD2 with Mrs. Jesse Balmer, Society 3 and Mrs. Robert Gregory, First Vice President serving as co-hostesses.

A communication was read from the Camp Jaycees Corporation in appreciation for approving them for the County Project for 1974. Deadline for contributions from individual societies is October 1.

A motion was passed to donate $10.00 to the Dairy Princess Pageant to be held June 29 at the Farm & Home Center.

The following committees were appointed to serve at the Lancaster County Convention to be held in November:

Program: Connie Rutt, Chairman, Arlene Eshleman, Ida Jane Zercher, Gertrude Habecker, Marie Bucher.

Nominating: Nancy Garber, Chairman, Velma Goss, Dorothy Leaman.

Memorial: Joan Hershey, Chairman, Elsie Witmer.

Decorating: Kathryn Fry, Chairman, Gloria Hocking, Helen Rohrer, Anna Mae Eby.

Ushers: Ruth Shultz, Janet Zeiset.

Luncheon Tickets: Claire Hess, Nancy Balmer.

Bazaar: Mary Kurtz, Chairman, Barbara Long, Emma Ruth Peifer, Anna Geyer, Kay Rohrer.

Registration: Ruth Shenk, Chairman, Serena Groff, Emily Greenwald, Jenny Groff.

Auditing: Mildred Charles, Ruth Landis.

Guests: Ann Nolt, Opal Ruhl.

The Farm Women State Convention will be held in Harrisburg January 6 and 7 1975.

The State Farm Women are sponsoring a tour to Mexico and Central America September 19 to October 11. For information or reservations contact: Mrs. Wilbur Erb, RD1, Harrisburg, Pa. 17111, 717—564-2177.

Members were urged to write to Senators and Representatives opposing the two bills in the U.S. Senate and House of Representatives which call for the elimination of all contributions to churches, schools, hospitals and other charitable, non-profit corporations, as deductions from your Federal Income Tax.

Homemakers Camp which is to be held at Camp Swatara August 25, 26 and 27 has August 9 as a deadline for all reservations. Contact Doris Thomas at the Extension Office. Cost is $14.00.

Next Board Meeting will be held Wednesday, August 7 at the Lampeter Fair Grounds in conjunction with the County Picnic.

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Advice For Clothing Fire Victims

Injuries resulting from burning fabrics or clothing are some of the most painful and costly. Every year there are about 2,1000 deaths and 150,000 nonfatal clothing fire casualties.

If your clothing catches fire, never run or remain standing. Drop and lie down where you are. If you are indoors, roll into a rug or a heavy article such as a coat or wool blanket. If you are outdoors, drop and roll on the ground.

Plunge burned skin in ice water and keep the burned area submerged until the pain disappears. Or apply towels that have been soaked in ice water. Don't put greasy ointments on burns. And if burns are serious, call you doctor immediately.

According to the National Fire Protection Association, the major causes of clothing ignition in the adult-age group are careless smoking, cook stoves, rubbish fires and heating stoves. Gasoline, lighter fluid and other flammable liquids spilled on clothing were factors in about 20 percent of the cases studied.

Four factors that determine the flammability or burning characteristics of clothing and fabrics:

1. All Fibers will burn under certain conditions. Synthetic fibers are usually less flammable than cotton, linen and silk fibers. But the tendency of some synthetics to melt and form a syrupy liquid tar-like substance can produce deep localized burns. Blends of different fibers will have varying burning characteristics depending on the amounts of the fibers used.
2. Tightly woven, heavy fabrics will burn more slowly than sheer, lightweight, loosely woven fabrics.
3. A napped fabric with air space between loose, fine fabrics will ignite much more readily than a smooth surface. Generally speaking, fabrics with whorter pile, greater density, and uncut loop construction will be less likely to burn than fabrics with a high, fluffy pile.
4. Close-fitting garments are less hazardous from a fire standpoint than loose-fitting ones. Flowing robes, flaring skirts, blousy sleeves, and ruffles are more likely to ignite in situations involving careless use of fire. Therefore, garments worn by men and boys are usually safer than those worn by girls and women.

Party Time For Pre-Schoolers

A party for a pre-schooler can be a real pleasure if the party is planned from a child's eye view. Remember that little one may become overly excited by large groups. Their attention span is limited. And competition may cause tenseness.

Rather than prizes, give identical party favors. Also, balloons, hats and candy cups are festive take home decorations.

Plan a number of games and change after short periods of time. But be sure everyone has a turn. Avoid elimination games with the very young. The first one out becomes restless and rejected.

Group activities, such as, singing games, where everyone joins in are better choices. Dress-up is another activity that young girls enjoy. Provide a variety of hats, handbags, jewelry and what-have-you and let them work in pairs getting all dressed up.

Simple crafts are also good and provide suitable quiet activity. Make up samples ahead of time so the child ren can see the finished product. The Soap and Detergent Association offers the following suggestion.

One idea is to provide each youngster with a bar of soap and variety of odds and ends — bits of fabrics, sequins, ribbon, netting, pipe cleaners. With a little glue and guidance, they can make a merry menagerie of funn creatures.

Or stitch simple han puppet shapes — to be use later as bath mitts — fror foam or solid color terr cloth. Let them add faci features with embroider paint.

Be sure to protect wor surfaces with an old plasti tablecloth or shower curtair And cover each child with a apron or smock. Dad's ol shirts work well for thi When finished, gather thes things together to be lau dered and ready for the ne time.

To avoid a mess bathroom, dip washcloths i sudsy water, wring and le the children wash up wit these before refreshment are served. Keep food simpl and serve small quanities. Accidents are common an usually very embarrassin to a youngster. So h prepared for an emergency!

As the party comes to a end, be sure each youn guest will have all his tak home favors together. I dividual paper bags wit names printed in bold ink ar a simple way to keep orde on this score — and thu avoid possible tears.

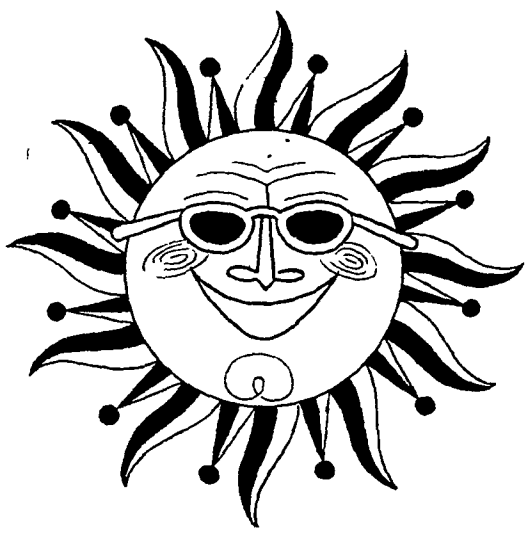
Hints to help you get maximum efficiency from your air conditioner



AIR CONDITIONER OPERATION

1. Make sure household wiring is adequate for the unit. Circuits not of sufficient amperage or voltage (or overloaded with other appliances) can cause inefficient operation or damage to the air conditioner as well as creating safety hazards.
2. Install unit in a shaded window and in an area not subject to heavy dust or pollen, if possible. Don't locate in dense shrubbery that would restrict outside air flow.
3. Seal around window (and other doors and windows) to prevent air leaks.
4. Leave storm sash in windows not normally needed for ventilation.
5. Keep rooms as cool as possible by drawing drapes and shades during hot sunny days.
6. Keep drapes or furniture clear of unit so as not to block air flow.
7. Minimize use of heat-generating appliances while air conditioner is working. Save laundering, ironing, automatic dishwashing, etc. for those cooler periods of the evening.
8. Use bathroom and kitchen exhaust fans while cooking or showering, to remove excess moisture. Always attempt to keep humidity down.
9. Attic fans or portable in-room fans are excellent air conditioning supplements.
10. Trees, awnings and other house shading devices also relieve air conditioning load. Adequate home insulation is a big help, too.
11. Use "fan only" setting whenever applicable.
12. Don't set temperature lower than you have to. Generally, no more than 10 degrees below outside temperature and never lower than 78 degrees, is a good energy-saving rule of thumb.

MAINTENANCE

1. Keep air conditioning equipment clean. Dust and vacuum accessible parts regularly . . . clean or change filters monthly.
2. If fan stops or cooling capacity drops abnormally, don't continue operation. Or, if any odors, smoke or unusual noises develop, unplug unit immediately and call for service.
3. As with any appliance, it's a good idea to study and follow the manufacturer's instructions (owner's manual) carefully.

PP&L hopes that you will use these tips to stretch your air conditioning dollar. Efficient operation saves on repair bills and adds to the life of the unit. You'll also be conserving energy and keeping your electric bill in check as well.

PP&L

STRANGE

Did you know that a Commonwealth bill consolidation loan can cut, rather than increase, your monthly debt load? The secret lies in replacing high interest or carrying charges with lower bank rates. Bills bothering you? Call a Commonwealth loan officer. Tell him you don't believe borrowing can cut total debt. Ask him to prove it to you.

Commonwealth National Bank

Offices throughout south central Pennsylvania

Tips For Storing Fertilizer

Give the fertilizer room to breathe by leaving an air space of 6 to 8 inches between each stack of bags. Always store in a dry place. Don't lay bags on a dirt or concrete floor because they will pick up moisture and "setup."

Do no stack fertilizer over 8 bags high and keep it away from animals, caution Extension agronomists at The Pennsylvania State University.

Ida Risser

The other evening I was very surprised to see a pair of wild geese on the bank of the Conestoga in our meadow, just below our house. They seemed quite relaxed and did not move away when I walked closer. Could it be they have a nest on a nearby island?

Lately, I've seen several unusual birds on our farm. There are beautiful Baltimore orioles with bright orange and black plumage. One morning an indigo bunting with its' blue feathers flew into an apple tree and disappeared. And to almost make us think we have a wildlife refuge here, we've seen a white crane in a meadow pond on a Sunday afternoon walk. The neighbors even found a raccoon nest with young in a rotted tree trunk.

xxx

Mistakes can be amusing, exasperating, or disastrous. The other day when I was preparing to ice my mother's birthday cake, a funny one happened to me. I filled a large bowl with a fluffy white powder which I thought was 10X sugar. Then I added cream and more cream but it was still fluffy and powdery. Finally I realized it was from the wrong 10 lb. plastic bag—I'd used cornstarch. But I didn't throw it away, as it will keep in the refrigerator until it's needed.

Long ago, a near disaster occurred when I gave my sister a spoon of cough medicine from a bottle on the bedroom windowsill. It happened that the medicine bottle contained a black disinfectant which was to be used when our family had scarlet fever.

The smell told me a mistake had been made and my father dashed the child to a doctor in our 1923 Overland.

Be Careful With Herbicides

Generally, it is not advisable to use chemical weed killers in the home garden, remind Extension vegetable specialists at The Pennsylvania State University.

This is due to the difficulty of applying proper rates for small areas and the danger of injuring adjacent crops. A home gardener is also limited in the number of chemicals he can economically use.

Homeowners and home gardeners who feel they may have special problems with weeds should contact their County Cooperative Extension Service office for information about control.

Could It Be?

There have been reports that tell us insanity in humans is decreasing. Could it be because so many things that used to be considered crazy are now quite common?

Kitchen Care

Spring usually means cleanup around the house. One room that requires constant cleaning and organization is the kitchen. Extension home management specialists at The Pennsylvania State University suggest you begin kitchen organization by first taking everything out of cupboards and drawers. Then wash out the cupboards and drawers and wash soiled items.

Then look at the items you have taken out. Don't let things you hardly ever use clutter up the space needed for items you use everyday. Store items you seldom use out of the way on a high shelf. Or wash, pack and label them. Then store them away in the attic or basement. Throw or give away any items that are broken or those you never use.

Now think about where you use the remaining items. Pots and pans may go best near the stove. But if you cook often with water, it may be better to store them near the sink. Skillets are probably best near the stove along with some measuring utensils, hot cereals, rice and noodles, says the Extension specialists.

You can put dry ingredients, other measuring utensils, baking dishes, cookie sheets and cake pans in the area where you mix food. Store eating dishes and cold cereal near your table. Store other boxed and canned foods elsewhere.

To keep detergents and cleansers handy you usually can store them near the sink. But keep them high up enough so they will be out of the reach of small children, caution the Extension home management specialists.

Doctor in the Kitchen®

by Laurence M. Hursh, M.D.
Consultant, National Dairy Council

NUTRITION A LA CARTE

- The big message in fruits and vegetables is vitamins. Quite a few of the foods in this group are rich in iron as well. Vegetables will "turn you on" whether you cook them or eat them raw. Fresh or canned fruits fit in with servings of fruits and vegetables daily as part of the four food group plan for good health.

- Your kitchen can be a dangerous room in your house. Cuts, falls, burns, and poisoning — all these can happen in the kitchen if you're not careful. Keep poisons and medicine somewhere else, out of reach. Prevent burns and cuts by not leaving these risks unattended. And keep your children away from electricity.

- Milk is an important food for the elderly. It contains a wide variety of nutrients. If chewing is a problem, milk, alone or with eggs, may be the major source of high quality protein. Calcium in milk may protect against demineralization of bones. Milk fat is sometimes tolerated when other fats cause digestive distress.

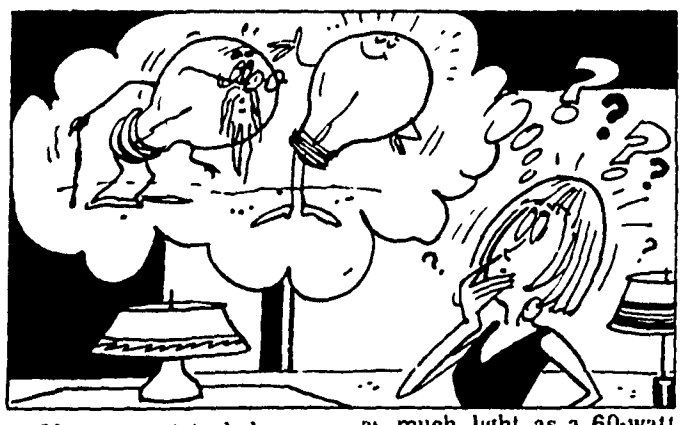
- Salads can make a wonderful lunch, especially for businessmen and women who have to return to a desk for an afternoon's work. Almost any restaurant menu now offers salads that are almost a complete meal in themselves. Have one with milk as a beverage and you'll avoid the sleepy afternoon feeling that a heavier meal can create.

- Good nutrition won't guarantee athletic ability. But it will go a long way to helping your young athlete reach his full potential in sports. Well balanced meals each day, plus nutritious snacks, are the pattern he should follow with four or more glass of milk a day and wide variety of other foods.

- Regularly I suggest that people would feel better if they stopped skipping breakfast. To save arguments in the family, have your breakfast "skippers" try eating breakfast for two or three weeks and let them appraise for themselves whether they do or do not feel better in the morning and accomplish more at school or at work.

- The hamburger is said to have been popular in Germany before immigrants brought the idea to the United States. But Americans were the first to put it a bun. This happened in 1904 at the St. Louis World's Fair, where the ice cream cone was also invented, and iced tea first served.

CHOOSE RIGHT LIGHT BULB TO SAVE A WATT



If you want to help save energy this year, don't just switch off a few lights. Instead, try to use your lighting efficiently. Tripping down a poorly lighted corridor and squinting at a newspaper by a light that is not producing sufficient light, are not good ways to conserve electricity. You don't have to give up comfort or safety to save a watt.

The wattage rating of a bulb is simply the measure of the power the bulb consumes. But all bulbs of the same wattage are not created equal. Some provide more light, while others last longer. The lumen rating of a bulb is the measure of how much light it gives. The higher the lumens, the more intense the light. For example, you can buy a 60-watt bulb with an 860 or a 765 lumen count and they will both use the same amount of power. The 860 lumen bulb will provide more light, while the 765 lumen bulb will have a longer life expectancy.

Here are a few tips from experts at Westinghouse on how to save power without giving up comfort.

You might find that a 60-watt bulb with a high lumen rating gives nearly as much light as a 75-watt bulb with a low one--and will provide 20% savings in power consumed.

New bulbs often produce more light than well-used ones while consuming the same amount of power, because the glass of old bulbs become blackened or dusty. After a while, a 100-watt bulb may provide only as much light as a 60-watt bulb--and waste 40 extra watts. It's a good idea to replace bulbs *before* they burn out.

A 100-watt bulb uses the same power as four 25-watt bulbs, but the 100-watt bulb produces 50% more light.

Using three-way bulbs and changing the setting to the appropriate level for different seeing tasks in the same room, creates flexibility in your lighting system and results in the efficient use of energy. Dimmer controls serve a similar purpose.

Fluorescent lighting is highly efficient. For example, a 40-watt deluxe cool white tube produces 2,200 lumens--which is the same output as a 150-watt incandescent bulb. That's an immediate savings of 100-watts.

Outdoors, mercury vapor bulbs provide efficient lighting. A deluxe 50-watt mercury vapor bulb produces the same amount of light as a standard 100-watt incandescent bulb--but uses 50% less energy and last 15 times longer.

Of course, use sunlight whenever possible, and be careful to turn off lights in unoccupied areas of the home.

Garden Activities

The wet weather has delayed many field and garden activities, and everyone will be anxious to catch up according to the calendar and past experience. However, we stress the importance of permitting the soil to dry sufficiently to work freely and not develop hard lumps. Heavy clay soils need more time to dry as compared to sandy or loam-type soils. Farmers with heavy equipment may suffer all summer if they work their fields when too wet. Also, we urge the operators of tractors and other farm machinery to take time to get the equipment properly adjusted before using it in the field. From a safety standpoint it is important to follow the manufacturer's directions by keeping all protective shields in place. The proper speed is very important for drills and planters. Don't expect planting accuracy when driving too fast. Take time to use the machines properly and be safe.

Editor's Quote Book

The man who loves home best, and loves it most unselfishly, loves his country best.

—Josiah Gilbert Holland

Bats' Sonar

Bats usually broadcast sonar pulses at frequencies too high for the hunman ear to hear. The pulses of certain bats have been measured at 145 decibels, comparable to the sound of some jets at takeoff.

The one feed additive for growth and feed savings plus 4 way control...

AUREO S·P 250®

In our feeds helps you control

★ ATROPHIC RHINITIS
★ SCOURS
★ CERVICAL ABSCESSES ★ STRESS

AUREO S•P 250* has proved to be the one feed additive that provides a wide range of benefits to pork producers. No other antibacterial in feed does so many things to help produce fast gains — improve feed efficiency — and provide superior protection against the major diseases that threaten sows and growing hogs.

AUREO S•P 250 helps save feed — reduces labor and medication costs — by keeping hogs gaining in the presence of atrophic rhinitis, controlling bacterial scours, reducing cervical abscesses — and helping prevent these diseases during stress.

AUREO S•P 250 is beneficial at every stage of growth and production.

*AUREO S•P 250 is the registered trademark for American Cyanamid Company's premix of AUREOMYCIN® chlortetracycline, SULMET® sulfamethazine and penicillin Withdraw seven days before slaughter

Food Additives Linked To Behavior Problems

The Pennsylvania Department of Agriculture has invited more than 60 representatives from the fields of medicine and education and the food processing industry to hear a presentation by a leading opponent of food additives.

Dr. Ben F. Feingold, Chief Emeritus, Department of Allergy, Kaiser-Permanente Medical Center, San Francisco, will speak at 10:30 a.m., June 4, in Room 309, Agriculture Building, Harrisburg.

Dr. Feingold's research, which has been reported in health care journals and before the American Medical Association, claims to have found a link between food additives, particularly artificial flavors and colors, and the rising incidence of learning and behavior problems among children.

Dr. Feingold puts the blame on the growing popularity of "convenience" foods. These items need little or no preparation after they are removed from their packaging and served. In a guest editorial in the October, 1973 issue of HOSPITAL PRACTICE, Dr. Feingold reported, "Clinical patterns involving practically every system of the body have been attributed to adverse reactions to flavors and colors. Complete control of the symptoms can usually be effected by exclusion of the offending agent, while reintroduction of the chemical(s) is followed by a recurrence of symptoms."

Although it appears that a large segment of the population, particularly adults, can ingest food additives without any harmful effects, Dr. Feingold believes that it would be helpful to the consumer if each food package which was additive-free carried a symbol indicating the absence of chemicals in the product.

Dr. Feingold's appearance at the Agriculture Building will be open to the public.

Weaver Names Analyst

Laura E. Stoltzfus, Colonial Park Apts., New Holland, has been promoted to the position of sales analyst within the Sale division of Victor F. Weaver, Inc., New Holland.

Since joining the Weaver organization in 1970, Miss Stoltzfus has served as a sales department clerk, general secretary, and Marketing Department secretary.

In her new position as sales analyst, she will be responsible for assisting in the development of sales forecasts, and sales program implementation, plus the evaluation of sales performance data.

AUSSIE TRACKER . . . The largest space-tracking antenna erected in Australia for the U.S. National Aeronautics and Space Administration was recently dedicated at the Tidbinbilla Deep Space Communication Complex near Canberra. The 64-meter-diameter antenna will be part of a global network designed to support NASA's deep-space research program.

NEWS OF EDUCATION

An American University Operates In The Middle East

Helping to create goodwill for America among all peoples of the Middle East, a team of surgeons performs an operation at the $30 million American University of Beirut Medical Center in Beirut, Lebanon. An adjunct to the oldest and largest American University abroad, the AUB Medical Center provides its patients with up-to-date medical techniques such as coronary bypass graft operations, renal dialysis, and cobalt cancer therapy. Last year over 100,000 patients received treatment at this modern, efficient, American medical center in the Middle East.

FARM TRENDS

[Continued from Page 1]

invited to the meeting in a letter from Smith. Also invited were representatives from the Pennsylvania Fair Fund Services in Harrisburg, Lancaster County Commissioners, Lancaster Chamber of Commerce and the extensive service at Penn State.

Smith will moderate the meeting and says it will be open to the public.

First Feeder Pig Sale
A Resounding Success

Over 100 buyers attended Lancaster Stockyards first feeder pig sale last Tuesday, and carted home 1056 little porkers. Sales have been set for every month for the rest of the year, according to Stockyards president William G. McCoy, with the next one scheduled for July 2. Other sales have been planned for August 6, September 3, October 1, November 5 and December 3. McCoy said that if the sales prove successful, they might be scheduled every other week.

Plans for the sale had been in the works for the past year. With a local source, area farmers no longer have to travel to out-of-state auctions to buy their feeder pigs. Prices were reported strong at Tuesday's three-hour sale, and the quality of the feeder pigs was said to be high.

Farm Prices Dip

Farm prices tumbled for the third straight month in May, but the result may be to increase already intense pressures on the administration to raise meat prices by limiting beef imports.

The Agriculture Department's monthly farm price report Friday showed average farm prices down another 4 per cent. They had already dropped 6 per cent in April and 4 per cent in March.

Prices have now fallen 14 per cent since the decline began in February.

Just what the latest decline means to retail food prices — which are expected, for all of 1974, to average 12 per cent above 1973 — remained uncertain.

Average retail prices turned down in April and retail estimates for May seemed likely to show declines for some foods including meat and poultry. But a section of the agriculture report on prices farmers paid for all food and tobacco in May showed a 2 per cent increase from April.

The most critical problem appeared to center around livestock, including beef cattle and hogs, which have now declined for four consecutive months and are 18 per cent below a year ago.

Cattle feeders have been complaining about heavy losses since last fall and hog producers, with their prices down to less than half of last year's record, found a sharply unfavorable feed ratio for May. The meat animal declines have produced widespread price cuts for retail shoppers in recent months, although administration officials claim the reductions could have been greater if food middlemen had passed on all the farm declines. But at the same time, pressure has been building for government action to ease the situation for farmers by limiting beef imports.

The government's beef import control program has been suspended, allowing unlimited imports, since mid-1972 when President Nixon lifted all barrier to help protect consumers from rising prices.

Now, however, producers say they are facing an unfair squeeze in which their own temporarily-glutted market is being forced to absorb extra Australian beef diverted here because Western Europe and Japan reduced imports sharply.

Some people believe that white cats are deaf and stupid!

Farm Tax

[Continued from Page 1]

Cafeteria, Routes 23 and 100; Wednesday, June 12, Honey Brook Grange Hall, Route 10, two miles south of Honey Brook; Thursday, June 13, Russellville Grange Hall, Russellville.

Chester County's new tax assessment goes into effect next year. Property taxes will be based on true market value as reflected by the new assessment.

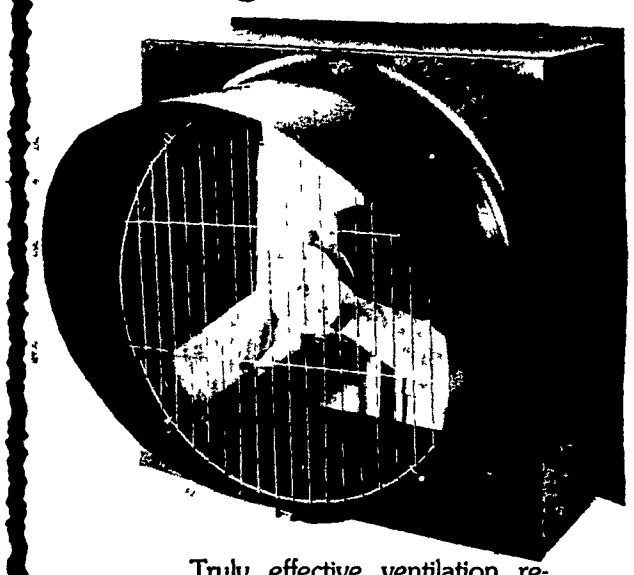
Landowners who are eligible for Act 515, and most farmers are elibible, can get tax relief only if they sign up. The agreement which individual landowners must sign calls for a ten-year convenant with the county in which the landowner pledges to keep all or most of his land in agricultural production, forests or other open space uses.

For more information about Act 515 and for application forms, contact the Chester County Board of Assessment Appeals, Courthouse - North Wing, Room 517 West Chester, Pa. 19380 (Telephone 215-696-9100, extension 213).

Breakfast Loss

An estimated 50 percent of the American population starts the day with an inadequate breakfast. By skipping or skimping on this important meal, individuals can miss 25 to 33 percent of their daily allowances of a variety of nutrients

Big Dutchman®
Controlled Ventilation Systems



Truly effective ventilation requires a well planned system of air exchange, designed for the particular needs of the building it is to serve, and incorporating quality, efficient mechanical fans and properly designed air inlets and controls.

Big Dutchman, backed by years of research, offers a complete line of ventilation equipment and planning service to provide precise environmental control in any poultry or livestock confinement operation.

Contact us for personalized information and service.

Now the liquid supplement with Controlled Release is here...

Nutrena Controlled Release CLS, the advanced liquid supplement, has two important advantages for cattlemen and dairymen compared with a conventional urea-molasses supplement.

Because it releases urea's protein-building nitrogen more slowly in the rumen, it makes better use of its productive power

In the same way it provides an extra margin of safety from urea toxicity which is important in self-feeding applications

GO Zero Concord FROM TEAT TO TANK!

NEW MODEL 70 S
Zero Concord
TWIN VACUUM PIPELINE
MILKING SYSTEM
-WITH COW MONITOR
It's a combination of a new, revolutionary pipeline milking machine and the ZERO Completely-Automated Vacuum Bulk Milk Cooler.

The ZERO CONCORD is the only system that provides stable milking vacuum at the teat end — in parlor or stanchion barn — with a low or high, short or long, pipeline — and without injecting air into the milker units to move the milk Only with stable vacuum and no air injection can you hope to reduce leucocyte counts up to 65% — increase milk production as much as 20% — and prevent off-flavor and rancid milk

The safe, stable vacuum is made possible by a patented, scientific principle TWIN-VACUUM whereby one vacuum milks the cows, and a different vacuum moves the milk through a separate pipeline into the bulk tank In addition — thanks to ZERO's patented SPATTER-SPRAY Automatic Washer and new, improved, high-capacity, transparent milker unit — you have built-in, "push-button", visible self-cleaning and sanitizing of the entire system — without disassembling And there are many other advantages

Farmers Receive Smaller Share of Consumer Dollar

Consumers are not getting the full benefit of the recent major declines in farm prices, William J. Kuhfuss, president of the American Farm Bureau Federation, said last week in Chicago. He addressed the 28th annual conference of Farm Bureau insurance accountants in the Palmer House. The federation has more than 2 million member families in 49 states and Puerto Rico.

The national farm leader said that the latest government figures show farmers receiving a smaller share of the consumer's dollar in April while marketing margins have increased.

The farmer's share of the consumer's dollar, he said, has dropped from 46 cents in January to 42.1 cents in April. In the same period, the share received by retailers and wholesalers increased from 54 to 57.9 cents.

Of equal and perhaps greater concern, Kuhfuss said, are the declines in farm prices ranging from 20 to 40 percent for various commodities from 1974 highs early in the year while farm production costs have increased 16 percent over a year ago.

These declines in prices from January and February to early May were as follows: wheat, 43 percent; corn, 22 percent; soybeans, 20 percent; hogs, 37 percent; choice steers, 18 percent; eggs, 43 percent, and broilers, 9 percent.

"For example," Kuhfuss said, "hogs sold for $27 per 100 pounds on May 28 of this week as compared with $61.88 last August and $43.12 on February 7, 1974. If hogs are bringing farmers 56 percent less than the 1973 high and 37 percent less than the 1974 high, it would seem that retail prices of pork chops, bacon and pork sausage ought to reflect these lower costs.

"Certainly consumers should expect lower bread prices in view of the drop in No. 1 winter wheat from a high of $6.14 per bushel February 19, 1974, to the current $3.47 per bushel. A pound of wheat flour — enough to bake a 1½ pound loaf of bread — which cost 16 cents in February is now selling for about 10 cents."

Kuhfuss said that his report on farm price declines and marketing margins was not aimed at putting all the blame on the middleman for current food costs, but to point out that there were many ingredients involved in food prices besides farm returns, including high fixed costs in processing, distribution and merchandising.

"All of us — the farmer, the consumer, wholesaler and retailer — are affected by continuing inflation, and there is a pressing need to improve efficiency all along the food line. Output per man-hour in agriculture has increased 3-¾ times since 1950, but this is of reduced benefit in stabilizing food prices without comparable productivity gains in other phases of the food industry.

"For example, it has been demonstrated that centralized meat cutting can reduce meat marketing costs substantially. Some outlets have adopted this practice, but labor-management agreements still impede a wider adoption of this cost-saving measure. Labor, packaging and transportation are major items in food marketing costs comprising 48.4, 12 and 7 percent respectively of such expenditures in 1973.

"While some increases in per unit marketing costs reflect increased services, and almost all costs have been increased by the inflationary trends of recent years, the fact remains that labor has been able to increase its share of the total food marketing bill from 44.2 percent in 1960 to 48.4 percent in 1973. This indicates that increases in labor costs have been a major factor in reducing the farmer's share of the consumer's food dollar."

Zoo Expands Dairy Exhibit

Construction began this week for an improved and expanded dairy cow exhibit at the Philadelphia Zoological Society's Children's Zoo. The announcement was made jointly by Robert Callahan, Director of the Children's Zoo, and Robert C. McKinley, President, Dairy Council Inc. Plans call for an improved facility, an automated milking system, a bright new dairy education exhibit, and for the acquisition of a guernsey cow to join the holstein - Moochelle - already in residence.

When completed, the Zoo will offer three milking demonstrations daily for its nearly half-million yearly visitors.

The project is being made possible through the financial support of Dairy Council Inc., Southampton, Pa., Inter-State Milk Producers' Cooperative, also of Southampton, and Lehigh Valley Cooperative Farmers, of Allentown, Pa.

Callahan expents the new facilities, with the help of Babson Bros. Co. and Longacre Electrical Service, Inc., to be completed by early July.

Rose Disease Control Urged

Proper use of certain fungicides will control black spot and powdery mildew, the two most serious diseases of roses, according to 16 years of testing by plant scientists at The Pennsylvania State University.

Black spot is best controlled by spraying at weekly intervals with fungicides containing either maneb or folpet. Powdery mildew of roses is restrained best by spraying with products containing benomyl, sold as Benlate and Benomyl.

The tests were carried out by L. P. Nichols and P. E. Nelson, plant pathologists with the College of Agriculture at Penn State. They have found that none of the available fungicides will truly control both black spot and powdery mildew of roses.

As for black spot, both maneb and folpet have given excellent control for several years. To date, benomyl has been the most effective fungicide for powdery mildew.

Rose growers are familiar with the damage caused by these diseases on roses. During wet weather, black spot may cause serious defoliation. This weakens rose plants and makes them more susceptible than otherwise to winter kill, Nichols and Nelson pointed out. Powdery mildew disfigures the leaves and flower buds with a powdery while mildew coating.

From 1964 to 1966, the fungicide trials were carried out at a commercial nursery in West Grove. They were moved to Longwood Gardens at Kennett Square in 1966 and are still underway there.

Each plot includes 5 plants and each treatment is reproduced 6 times, so that 30 plants are involved in each treatment. There are 8 treatments, including a "no spray" treatment, to evaluate control of black spot – and an equal number to evaluate control of powdery mildew.

These annual trials of the most effective fungicides for control of black spot and powdery mildew on roses will be continued, Nichols and Helson state. One of their goals is to find a single fungicide that will control both black spot and powdery mildew.

Ear Hygiene

Washing behind the ears isn't enough. Crevices of the ears should be given a sudsy lathering, too, says Mrs. Ruth Ann Wilson, Extension clothing specialist at The Pennsylvania State University. For children and teens, this may be one of the most neglected areas of personal cleanliness. Wax is a natural protective substance for delicate ear membranes, but in the outer areas wax combines with airborne dust, and cleaning is necessary. Wash ears with water and a washcloth on a finger. Avoid using any instrument to "dig" with.

Check Quality of Lentils

When shopping for lentils, Extension consumer specialists at The Pennsylvania State University, suggest you try to buy beans, peas and other lentils in cellophane bags or other "see through" packages. Look for products that have a bright uniform color. Loss of color usually indicates long storage, lack of freshness and a product that takes longer to cook. Eating quality will not be affected, however. The Extension specialists also recommend you look for uniformly sized lentils. Mixed sizes result in uneven cooking. Also, cracked seed coats, foreign material and pinholes caused by insect damage are signs of low-quality products.

AGWAY

LPS

MILK-CHECK PROTECTION

WHEN YOUR COWS GO ON PASTURE

Although high in protein at the start, spring pastures deteriorate rapidly -- and your cows and heifers will know it before you do. You will not be aware of it until milk production starts to suffer. And it may take more time and money than you'd like to bring production back up again. What can you do to prevent pasture slump?

PUT AN AGWAY LPS FEEDER IN YOUR PASTURE FOR COWS AND HEIFERS.

LPS IS THE SENSIBLE LIQUID PROTEIN SUPPLEMENT FOR THESE REASONS:

- LPS supplies protein to compensate for the decline in pasture quality.
- Cows and heifers offered LPS free-choice tend to adjust their consumption to more closely balance their protein needs.
- LPS has the slowest ammonia release among leading supplements offered in the Northeast. (Slow release assures optimum nutrient use).
- LPS is an economical source of protein.
- LPS is a safe, efficient way to feed urea.
- Free-choice LPS means no labor. Agway fills the feeder, cows and heifers help themselves.

CALL YOUR LOCAL AGWAY TODAY.

GET ALL THE DETAILS ON LPS -- THE SENSIBLE LIQUID PROTEIN SUPPLEMENT.
